UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended **June 30, 2018**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 0-12247

SOUTHSIDE BANCSHARES, INC.

(Exact name of registrant as specified in its charter)

TEXAS

(State or other jurisdiction of incorporation or organization)

75-1848732

(I.R.S. Employer Identification No.)

1201 S. Beckham Avenue, Tyler, Texas

(Address of principal executive offices)

75701

(Zip Code)

903-531-7111

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Non-accelerated filer

Accelerated filer

(Do not check if a smaller reporting company)

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the issuer's common stock, par value \$1.25, outstanding as of July 23, 2018 was 35,089,372 shares.

SOUTHSIDE BANCSHARES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting and Reporting Policies

Basis of Presentation

In this report, the words “the Company,” “we,” “us,” and “our” refer to the combined entities of Southside Bancshares, Inc. and its subsidiaries. The words “Southside” and “Southside Bancshares” refer to Southside Bancshares, Inc. The words “Southside Bank” and “the Bank” refer to Southside Bank. “Omni” refers to OmniAmerican Bancorp, Inc., a bank holding company, and its wholly-owned subsidiary, OmniAmerican Bank, acquired by Southside on December 17, 2014. “Diboll” refers to Diboll State Bancshares, Inc., a bank holding company and its wholly-owned subsidiary, First Bank & Trust East Texas, acquired by Southside on November 30, 2017.

The accompanying unaudited consolidated financial statements have been prepared in accordance with United States (“U.S.”) generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, not all information required by GAAP for complete financial statements is included in these interim statements. In the opinion of management, all adjustments necessary for a fair presentation of such financial statements have been included. Such adjustments consisted only of normal recurring items. The preparation of these consolidated financial statements in accordance with GAAP requires the use of management’s estimates. These estimates are subjective in nature and involve matters of judgment. Actual amounts could differ from these estimates.

Interim results are not necessarily indicative of results for a full year. These financial statements should be read in conjunction with the financial statements and notes thereto in our Annual Report on Form 10-K for the year ended December 31, 2017.

Accounting Changes and Reclassifications

Certain prior period amounts have been reclassified to conform to current year presentation.

We adopted Accounting Standards Update (“ASU”) 2014-09, “Revenue from Contracts with Customers (Topic 606)” as modified by subsequently issued ASUs 2015-14, 2016-08, 2016-10, 2016-12 and 2016-20, on January 1, 2018, the effective date of the guidance, using the modified retrospective approach. As the majority of the Company’s revenues are not subject to the new guidance, the adoption of ASU 2014-09 did not have a material impact on the Company’s consolidated financial position, results of operations, equity or cash flows. We did adjust the presentation of revenue received from our brokerage services, merchant services, as well as our interchange income associated with debit card services, which were all deemed to be services offered in an agent capacity. These lines of revenue will now be presented on a net basis with the fee income disclosed net of the related costs in the noninterest income section of the consolidated statements of income. In connection with the adoption, for the three and six months ended June 30, 2018, we netted \$988,000 and \$1.8 million of debit card expense against deposit services income and \$151,000 and \$302,000 of brokerage expense against brokerage income, respectively. Due to the implementation of the guidance under the modified retrospective method, prior periods have not been adjusted and are not comparative. Refer to our revenue recognition discussion below and “Note 1 - Summary of Significant Accounting and Reporting Policies” in our Annual Report on Form 10-K for the year ended December 31, 2017 for more information related to our revenue recognition policies.

We adopted ASU 2016-01, “Financial Instruments – Overall (Subtopic 825-10) – Recognition and Measurement of Financial Assets and Financial Liabilities,” on January 1, 2018, the effective date of the guidance. ASU 2016-01, among other things, (i) requires equity investments, with certain exceptions, to be measured at fair value with changes in fair value recognized in net income, (ii) simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment, (iii) eliminates the requirement for public business entities to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet, (iv) requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, (v) requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments, (vi) requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements and (vii) clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available for sale (“AFS”) securities in combination with the entity’s other deferred tax assets. The guidance requires companies to apply the requirements in the year of adoption, through cumulative adjustment, while the guidance related to equity securities without readily determinable fair values should be applied prospectively. Adoption of this guidance resulted in a cumulative adjustment to retained earnings of \$85,000, net of tax, on January 1, 2018 and an equity security with a carrying value of \$5.9 million that was previously recognized in securities AFS, at estimated fair value on our consolidated balance sheet to instead be recognized in equity investments, with subsequent changes in fair value being

Table of Contents

recognized in income. Also in conjunction with the adoption, our fair value measurement of financial instruments will be based upon an exit price notion as required in ASC 820. The guidance was applied on a prospective approach resulting in prior periods no longer being comparable.

We adopted ASU 2017-07, “Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost,” on January 1, 2018. ASU 2017-07 requires employers to present the service cost component of net periodic postretirement benefit cost in the same income statement line item as other employee compensation costs arising from services rendered during the period. Employers are required to present the other components of the net periodic benefit cost separately from the line item that includes the service cost and outside of any subtotal of operating income, if one is presented. The guidance requires companies to apply the requirements retrospectively to all prior periods presented. We elected to use the practical expedient that permits us to use the amounts in our pension plan disclosures in our employee benefit footnote for the prior comparative periods as the estimation basis for applying the retrospective presentation requirements, which resulted in an increase of \$69,000 and \$157,000 in salaries and employee benefits expense and a decrease of \$69,000 and \$157,000 in other noninterest expense for the three and six months ended June 30, 2017, respectively.

We early adopted ASU 2017-12, “Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities,” on January 1, 2018. ASU 2017-12 (i) expands hedge accounting for nonfinancial and financial risk components and amends measurement methodologies to more closely align hedge accounting with a company’s risk management activities, (ii) decreases the complexity of preparing and understanding hedge results by eliminating the separate measurement and reporting of hedge ineffectiveness, (iii) enhances transparency, comparability, and understanding of hedge results through enhanced disclosures and changing the presentation of hedge results to align the effects of the hedging instrument and the hedged item, and (iv) reduces the cost and complexity of applying hedge accounting by simplifying the manner in which assessments of hedge effectiveness may be performed. The guidance also permits a transition election to reclassify held to maturity (“HTM”) securities to AFS securities if a portion of those securities would qualify to be hedged under the new “last-of-layer” approach. The guidance requires companies to apply the requirements to existing hedging relationships on the date of adoption, and the effect of the adoption should be reflected as of the beginning of the fiscal year of adoption. The guidance did not have an impact on our derivatives that qualified as hedges on the date of adoption and thus no adjustment was made to retained earnings. In conjunction with the adoption of ASU 2017-12, we made the transition election to reclassify approximately \$743.4 million in book value of securities from HTM to AFS that qualified for the last-of-layer method described in ASU 2017-12.

During the three months ended June 30, 2018, we entered into partial term fair value hedges, as allowed under the recently adopted ASU 2017-12, for certain of our fixed rate callable AFS municipal securities. These hedges are expected to be effective in offsetting changes in the fair value of the hedged securities. Gains and losses on derivative instruments designated as fair value hedges, as well as the change in fair value on the hedged item, are recorded in interest income in the consolidated statements of income.

Revenue Recognition

Our revenue consists of net interest income on financial assets and financial liabilities and noninterest income. The classifications of our revenue are presented in the consolidated statements of income. On January 1, 2018, we adopted ASU 2014-09, “Revenue from Contracts with Customers (Topic 606)” using the modified retrospective method. The revenue recognition principle in ASU 2014-09 is that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

ASU 2014-09 permits an entity to recognize the incremental costs of obtaining a contract as an expense when incurred if the amortization period of the asset would have been one year or less. We generally expense sales commissions when incurred because the amortization period is within one year or less. These costs are recorded within salaries and employee benefits on the consolidated statements of income.

Revenue is recognized when obligations under the terms of a contract with our customer are satisfied; generally this occurs with the transfer of control of goods or services. Under ASU 2014-09’s practical expedient to recognize revenue equal to the amounts for which we have a right to invoice, revenue is measured as the amount of consideration we expect to receive in exchange for the transfer of those goods or services.

The following summarizes our revenue recognition policies as they relate to revenue from contracts with customers under ASU 2014-09:

- *Deposit services.* Service charges on deposit accounts include fees for banking services provided, overdrafts and non-sufficient funds. Revenue is generally recognized in accordance with published deposit account agreements for retail accounts or contractual agreements for commercial accounts. Our deposit services also include our ATM and debit card interchange revenue that is presented net of the associated costs. Interchange revenue is generated by our deposit customers’ usage and volume of activity. Interchange rates are not controlled by the Company, which effectively acts as processor that collects and remits payments associated with customer debit card transactions.

Table of Contents

- *Trust income.* Trust income includes fees and commissions from investment management, administrative and advisory services primarily for individuals, and to a lesser extent, partnerships and corporations. Revenue is recognized on an accrual basis at the time the services are performed and when we have a right to invoice and are based on either the market value of the assets managed or the services provided.
- *Brokerage services.* Brokerage services income includes fees and commissions charged when we arrange for another party to transfer brokerage services to a customer. The fees and commissions under this agent relationship are based upon stated fee schedules based upon the type of transaction, volume, and value of the services provided.
- *Other noninterest income.* Other noninterest income includes among other things, merchant services income. Merchant services revenue is derived from third party vendors that process credit card transactions on behalf of our merchant customers. Merchant services revenue is primarily comprised of residual fee income based on the referred merchant's processing volumes and/or margin.

Securities

Available for Sale ("AFS"). Debt securities that will be held for indefinite periods of time, including securities that may be sold in response to changes in market interest or prepayment rates, needs for liquidity and changes in the availability of and the yield on alternative investments are classified as AFS. These assets are carried at fair value with changes recorded in other comprehensive income. Fair value is determined using quoted market prices as of the close of business on the balance sheet date. If quoted market prices are not available, fair values are based on quoted market prices for similar securities or estimates from independent pricing services. Securities that are hedged with qualifying derivatives are carried at fair value with the change in fair value on both the hedged instrument and the securities recorded in interest income in the consolidated statements of income.

Held to Maturity ("HTM"). Debt securities that management has the positive intent and ability to hold until maturity are classified as HTM and are carried at their remaining unpaid principal balance, net of unamortized premiums or unaccreted discounts.

Equity Investments. Beginning January 1, 2018, upon adoption of ASU 2016-01, equity investments with readily determinable fair values are stated at fair value with unrealized gains and losses reported in income. For periods prior to January 1, 2018, certain equity investments were classified as AFS and stated at fair value with unrealized gains and losses reported as a separate component of accumulated other comprehensive income ("AOCI"), net of tax. Equity investments without readily determinable fair values are recorded at cost less impairment, if any.

Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)." ASU 2016-02 requires a lessee to recognize assets and liabilities for leases with lease terms of more than 12 months. Consistent with current GAAP, the recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification as a finance or operating lease. However, unlike current GAAP which requires only capital leases to be recognized on the balance sheet, the new ASU 2016-02 will require both finance (formerly known as "capital") and operating leases to be recognized on the balance sheet. ASU 2016-02 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted. The guidance requires companies to apply the requirements in the year of adoption using a modified retrospective approach. We are currently evaluating the impact this guidance will have on our consolidated financial statements, and we anticipate our assessment to be completed during the fiscal year 2018.

In June 2016, the FASB issued ASU 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." ASU 2016-13 introduces an approach based on expected losses to estimate credit losses on certain types of financial instruments. ASU 2016-13 also modifies the impairment model for AFS debt securities and provides for a simplified accounting model for purchased financial assets with credit deterioration since their origination. ASU 2016-13 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The guidance requires companies to apply the requirements in the year of adoption through cumulative adjustment with some aspects of the update requiring a prospective transition approach. We are currently evaluating the potential impact of the pending adoption of ASU 2016-13 on our consolidated financial statements. We plan to adopt on January 1, 2020, the effective date. We have developed a project plan and have assigned a project team to complete the analysis needed to implement the guidance. The team is currently completing the gap analysis/data collection and anticipates running parallel models in early 2019.

In January 2017, the FASB issued ASU 2017-04, "Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment." ASU 2017-04 is intended to simplify goodwill impairment testing by eliminating the second step of the analysis which requires the calculation of the implied fair value of goodwill to measure a goodwill impairment charge. The update requires entities to compare the fair value of a reporting unit with its carrying amount and recognize an impairment charge for any amount by which the carrying amount exceeds the reporting unit's fair value, to the extent that the loss recognized does not exceed the amount of goodwill allocated to that reporting unit. ASU 2017-04 is effective for annual and interim goodwill impairment tests performed in periods beginning after December 15, 2019. Early adoption is permitted for annual and interim goodwill impairment

Table of Contents

testing dates after January 1, 2017. The guidance requires companies to apply the requirements prospectively in the year of adoption. ASU 2017-04 is not expected to have a significant impact on our consolidated financial statements.

In March 2017, the FASB issued ASU 2017-08, "Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities." Under current GAAP, premiums on callable debt securities are generally amortized over the contractual life of the security. ASU 2017-08 requires the premium on callable debt securities to be amortized to the earliest call date. If the debt security is not called at the earliest call date, the holder of the debt security would be required to reset the effective yield on the debt security based on the payment terms required by the debt security. ASU 2017-08 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. We have elected to adopt on January 1, 2019. The guidance requires companies to apply the requirements on a modified retrospective basis through a cumulative adjustment directly to retained earnings as of the beginning of the period of adoption. We have evaluated an estimate of the potential impact of the pending adoption of ASU 2017-08 on our consolidated financial statements. Based on our existing municipal securities portfolio, we believe the change to amortizing premiums to the earliest call date will increase amortization expense recorded through interest income for the year ended December 31, 2019 by approximately \$3.4 million, net of tax.

2. Acquisition

On November 30, 2017, we acquired 100% of the outstanding stock of Diboll State Bancshares, Inc. and its wholly-owned subsidiary First Bank & Trust East Texas (collectively, "Diboll") headquartered in Diboll, Texas. Diboll operated 17 banking offices in Diboll and surrounding areas. We acquired Diboll to further expand our presence in the East Texas market. The operations of Diboll were merged into the Company as of the date of the acquisition.

The Diboll acquisition was accounted for using the acquisition method of accounting and accordingly, purchased assets, including identifiable intangible assets and assumed liabilities were recorded at their respective acquisition date fair values. The purchase price allocation is preliminary and is subject to final determination and valuation of the fair value of assets acquired and liabilities assumed. As of December 31, 2017, the Company recognized \$109.7 million in initial goodwill associated with the Diboll acquisition. Our consolidated goodwill totaled \$201.2 million as of June 30, 2018 and December 31, 2017. For more information concerning the fair value of the assets acquired and liabilities assumed in relation to the acquisition of Diboll, see "Note 2 - Acquisition" in our Annual Report on Form 10-K for the year ended December 31, 2017.

3. Earnings Per Share

Earnings per share on a basic and diluted basis are calculated as follows (in thousands, except per share amounts).

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Basic and Diluted Earnings:				
Net income	\$ 20,203	\$ 14,481	\$ 36,454	\$ 29,470
Basic weighted-average shares outstanding	35,062	29,318	35,042	29,303
Add: Stock awards	171	201	175	208
Diluted weighted-average shares outstanding	35,233	29,519	35,217	29,511
Basic Earnings Per Share:				
Net Income	\$ 0.58	\$ 0.49	\$ 1.04	\$ 1.01
Diluted Earnings Per Share:				
Net Income	\$ 0.57	\$ 0.49	\$ 1.04	\$ 1.00

For the three- and six-month periods ended June 30, 2018, there were approximately 53,000 and 47,000 anti-dilutive shares, respectively. For the three- and six-month periods ended June 30, 2017, there were approximately 52,000 and 51,000 anti-dilutive shares, respectively.

4. Accumulated Other Comprehensive Income (Loss)

The changes in accumulated other comprehensive income (loss) by component are as follows (in thousands):

	Three Months Ended June 30, 2018				
	Unrealized Gains (Losses) on Securities	Unrealized Gains (Losses) on Derivatives	Pension Plans		Total
			Net Prior Service (Cost) Credit	Net Gain (Loss)	
Beginning balance, net of tax	\$ (35,594)	\$ 9,652	\$ (134)	\$ (25,894)	\$ (51,970)
Other comprehensive income (loss):					
Other comprehensive (loss) income before reclassifications	(10,371)	1,725	—	—	(8,646)
Reclassified from accumulated other comprehensive income	1,584	(331)	(2)	620	1,871
Income tax benefit (expense)	1,845	(293)	1	(130)	1,423
Net current-period other comprehensive (loss) income, net of tax	(6,942)	1,101	(1)	490	(5,352)
Ending balance, net of tax	\$ (42,536)	\$ 10,753	\$ (135)	\$ (25,404)	\$ (57,322)

	Six Months Ended June 30, 2018				
	Unrealized Gains (Losses) on Securities	Unrealized Gains (Losses) on Derivatives	Pension Plans		Total
			Net Prior Service (Cost) Credit	Net Gain (Loss)	
Beginning balance, net of tax	\$ (16,295)	\$ 6,399	\$ (133)	\$ (26,269)	\$ (36,298)
Other comprehensive income (loss):					
Other comprehensive (loss) income before reclassifications	(35,872)	5,970	—	—	(29,902)
Reclassified from accumulated other comprehensive income (1)	2,656	(458)	(4)	1,095	3,289
Income tax benefit (expense)	6,975	(1,158)	2	(230)	5,589
Net current-period other comprehensive (loss) income, net of tax	(26,241)	4,354	(2)	865	(21,024)
Ending balance, net of tax	\$ (42,536)	\$ 10,753	\$ (135)	\$ (25,404)	\$ (57,322)

- (1) As discussed in “Note 1 – Summary of Significant Accounting and Reporting Policies,” the Company adopted ASU 2016-01 on January 1, 2018. This amount includes a reclassification for the cumulative adjustment to retained earnings of \$107,000 (\$85,000, net of tax).

Three Months Ended June 30, 2017

	Pension Plans				Total
	Unrealized Gains (Losses) on Securities	Unrealized Gains (Losses) on Derivatives	Net Prior Service (Cost) Credit	Net Gain (Loss)	
Beginning balance, net of tax	\$ (20,425)	\$ 4,961	\$ (134)	\$ (18,993)	\$ (34,591)
Other comprehensive income (loss):					
Other comprehensive income (loss) before reclassifications	13,221	(1,768)	—	—	11,453
Reclassified from accumulated other comprehensive income	288	223	(2)	416	925
Income tax (expense) benefit	(4,728)	541	—	(145)	(4,332)
Net current-period other comprehensive income (loss), net of tax	8,781	(1,004)	(2)	271	8,046
Ending balance, net of tax	\$ (11,644)	\$ 3,957	\$ (136)	\$ (18,722)	\$ (26,545)

Six Months Ended June 30, 2017

	Pension Plans				Total
	Unrealized Gains (Losses) on Securities	Unrealized Gains (Losses) on Derivatives	Net Prior Service (Cost) Credit	Net Gain (Loss)	
Beginning balance, net of tax	\$ (23,708)	\$ 4,595	\$ (133)	\$ (19,247)	\$ (38,493)
Other comprehensive income (loss):					
Other comprehensive income (loss) before reclassifications	18,106	(1,575)	—	—	16,531
Reclassified from accumulated other comprehensive income	454	593	(4)	807	1,850
Income tax (expense) benefit	(6,496)	344	1	(282)	(6,433)
Net current-period other comprehensive income (loss), net of tax	12,064	(638)	(3)	525	11,948
Ending balance, net of tax	\$ (11,644)	\$ 3,957	\$ (136)	\$ (18,722)	\$ (26,545)

Table of Contents

The reclassifications out of accumulated other comprehensive income (loss) into net income are presented below (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Unrealized losses on securities transferred:				
Amortization of unrealized losses (1)	\$ (1,252)	\$ (213)	\$ (1,390)	\$ (701)
Tax benefit	263	75	292	245
Net of tax	\$ (989)	\$ (138)	\$ (1,098)	\$ (456)
Unrealized gains and losses on available for sale securities:				
Realized net (loss) gain on sale of securities (2)	\$ (332)	\$ (75)	\$ (1,159)	\$ 247
Tax benefit (expense)	70	26	243	(86)
Net of tax	\$ (262)	\$ (49)	\$ (916)	\$ 161
Derivatives:				
Realized net gain (loss) on interest rate swap derivatives (3)	\$ 309	\$ (245)	\$ 415	\$ (624)
Tax (expense) benefit	(65)	86	(87)	218
Net of tax	\$ 244	\$ (159)	\$ 328	\$ (406)
Amortization of unrealized gains on terminated interest rate swap derivatives (3)	\$ 22	\$ 22	\$ 43	\$ 31
Tax expense	(5)	(8)	(9)	(11)
Net of tax	\$ 17	\$ 14	\$ 34	\$ 20
Amortization of pension plan:				
Net actuarial loss (4)	\$ (620)	\$ (416)	\$ (1,095)	\$ (807)
Prior service credit (4)	2	2	4	4
Total before tax	(618)	(414)	(1,091)	(803)
Tax benefit	129	145	228	281
Net of tax	(489)	(269)	(863)	(522)
Total reclassifications for the period, net of tax	\$ (1,479)	\$ (601)	\$ (2,515)	\$ (1,203)

(1) Included in interest income on the consolidated statements of income.

(2) Listed as net (loss) gain on sale of securities available for sale on the consolidated statements of income.

(3) Included in interest expense for FHLB borrowings on the consolidated statements of income.

(4) These accumulated other comprehensive income components are included in the computation of net periodic pension cost (income) presented in "Note 8 - Employee Benefit Plans."

- (1) All mortgage-backed securities issued and/or guaranteed by U.S. government agencies or U.S. government-sponsored enterprises.
(2) See “Note 1 – Summary of Significant Accounting and Reporting Policies” for further information.

From time to time, we have transferred securities from AFS to HTM due to overall balance sheet strategies. The remaining net unamortized, unrealized loss on the transferred securities included in AOCI in the accompanying balance sheets totaled \$15.6 million (\$12.4 million, net of tax) at June 30, 2018 and \$17.4 million (\$13.8 million, net of tax) at December 31, 2017. Any net unrealized gain or loss on the transferred securities included in AOCI at the time of transfer will be amortized over the remaining life of the underlying security as an adjustment to the yield on those securities. Securities transferred with losses included in AOCI continue to be included in management’s assessment for other-than-temporary impairment for each individual security. There were no securities transferred from AFS to HTM during the six months ended June 30, 2018 or the year ended December 31, 2017.

On January 1, 2018, we early-adopted ASU 2017-12, “Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities,” and in conjunction with the adoption took the one-time transition election to reclassify approximately \$743.4 million book value of securities from HTM to AFS that qualified for hedging under the last-of-layer approach. The unrealized gain of \$11.9 million (\$9.4 million, net of tax) on the transferred securities was recognized in other comprehensive income on the date of transfer.

[Table of Contents](#)

We review those securities in an unrealized loss position for significant differences between fair value and the cost basis to evaluate if a classification of other-than-temporary impairment is warranted. In estimating other-than-temporary impairment losses, management considers, among other things, the length of time and the extent to which the fair value has been less than cost and the financial condition and near-term prospects of the issuer. We consider an other-than-temporary impairment to have occurred when there is an adverse change in expected cash flows. When it is determined that a decline in fair value of AFS and HTM securities is other-than-temporary, the carrying value of the security is reduced to its estimated fair value, with a corresponding charge to earnings for the credit portion and a charge to other comprehensive income for the noncredit portion. Based upon the length of time and the extent to which fair value is less than cost, we believe that none of the securities with an unrealized loss have other-than-temporary impairment at June 30, 2018.

The majority of the securities in an unrealized loss position are highly rated Texas municipal securities and U.S. Agency mortgage-backed securities (“MBS”) where the unrealized loss is a direct result of the change in interest rates and spreads. For those securities in an unrealized loss position, we do not currently intend to sell the securities and it is not more likely than not that we will be required to sell the securities before the anticipated recovery of their amortized cost basis. To the best of management’s knowledge and based on our consideration of the qualitative factors associated with each security, there were no securities in our investment and MBS portfolio with an other-than-temporary impairment at June 30, 2018.

(1) See “Note 1 – Summary of Significant Accounting and Reporting Policies” for further information.

Of the \$1.2 million in net securities loss from the AFS portfolio for the six months ended June 30, 2018, there were \$1.5 million in realized gains and \$2.7 million in realized losses. Of the \$247,000 in net securities gains from the AFS portfolio for the six months ended June 30, 2017, there were \$3.6 million in realized gains and \$3.3 million in realized losses. There were no sales from the HTM portfolio during the six months ended June 30, 2018 or 2017. We calculate realized gains and losses on sales of securities under the specific identification method.

Table of Contents

The amortized cost and estimated fair value of AFS and HTM securities at June 30, 2018, are presented below by contractual maturity (in thousands). Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. MBS are presented in total by category due to the fact that MBS typically are issued with stated principal amounts, and the securities are backed by pools of mortgages that have loans with varying maturities. The characteristics of the underlying pool of mortgages, such as fixed-rate or adjustable-rate, as well as prepayment risk, are passed on to the security holder. The term of a mortgage-backed pass-through security thus approximates the term of the underlying mortgages and can vary significantly due to prepayments.

Total	<u><u>\$ 164,276</u></u>	<u><u>\$ 159,055</u></u>

Investment securities and MBS with carrying values of \$1.23 billion and \$1.24 billion were pledged as of June 30, 2018 and December 31, 2017, respectively. Pledged securities may be used to collateralize one or more of the following: Federal Home Loan Bank of Dallas (“FHLB”) borrowings, repurchase agreements, and public funds or for other purposes as required by law.

Equity Investments

Equity investments on our consolidated balance sheet include Community Reinvestment Act funds with a readily determinable fair value as well as equity investments without readily determinable fair values. At June 30, 2018, we had equity investments recorded in our consolidated balance sheet of \$12.0 million. At December 31, 2017, we had \$5.8 million in equity investments without readily determinable fair values recorded at cost, which approximated their fair value.

Beginning January 1, 2018, upon adoption of ASU 2016-01, equity investments with readily determinable fair values are stated at fair value with realized and unrealized gains and losses reported in income. For periods prior to January 1, 2018, these equity investments were classified as AFS and stated at fair value with unrealized gains and losses reported as a separate component of AOCI, net of tax. Equity investments without readily determinable fair values are recorded at cost less any impairment, if any.

[Table of Contents](#)

At December 31, 2017, we had \$5.9 million in equity investments included in AFS securities and recorded at fair value, with net unrealized losses of \$85,000, net of tax, recognized in AOCI. On January 1, 2018, these unrealized losses were reclassified out of AOCI and into retained earnings with subsequent changes in fair value being recognized in net income. The following is a summary of unrealized and realized gains and losses recognized in net income on equity investments during the three and six months ended June 30, 2018 (in thousands):

	Three Months Ended June 30, 2018	Six Months Ended June 30, 2018
Net (losses) recognized during the period on equity investments	\$ (42)	\$ (134)
Less: Net gains and (losses) recognized during the period on equity investments sold during the period	—	—
Unrealized (losses) recognized during the reporting period on equity investments still held at the reporting date	\$ (42)	\$ (134)

Equity investments are assessed quarterly for other-than-temporary impairment. Based upon that evaluation, management does not consider any of our equity investments to be other-than-temporarily impaired at June 30, 2018.

Federal Home Loan Bank Stock

Our FHLB stock, which has limited marketability, is carried at cost.

6. Loans and Allowance for Probable Loan Losses

Loans in the accompanying consolidated balance sheets are classified as follows (in thousands):

	June 30, 2018	December 31, 2017
Real Estate Loans:		
Construction	\$ 487,286	\$ 475,867
1-4 Family Residential	791,359	805,341
Commercial	1,245,936	1,265,159
Commercial Loans	282,723	266,422
Municipal Loans	345,595	345,798
Loans to Individuals	117,984	135,769
Total Loans	3,270,883	3,294,356
Less: Allowance for Loan Losses (1)	25,072	20,781
Net Loans	\$ 3,245,811	\$ 3,273,575

- (1) Loans acquired with the Diboll acquisition were measured at fair value on November 30, 2017 with no carryover of allowance for loan loss. The allowance for loan loss recorded on purchase credit impaired (“PCI”) loans totaled \$358,000 as of June 30, 2018. There was no allowance for loan loss recorded on PCI loans as of December 31, 2017.

Real Estate Construction Loans

Our construction loans are collateralized by property located primarily in or near the market areas we serve. A number of our construction loans will be owner occupied upon completion. Construction loans for non-owner occupied projects are financed, but these typically have cash flows from leases with tenants, secondary sources of repayment, and in some cases, additional collateral. Our construction loans have both adjustable and fixed interest rates during the construction period. Construction loans to individuals are typically priced and made with the intention of granting the permanent loan on the property. Speculative and commercial construction loans are subject to underwriting standards similar to that of the commercial portfolio. Owner occupied 1-4 family residential construction loans are subject to the underwriting standards of the permanent loan.

Real Estate 1-4 Family Residential Loans

Residential loan originations are generated by our loan officers, in-house origination staff, marketing efforts, present customers, walk-in customers and referrals from real estate agents and builders. We focus our lending efforts primarily on the origination of loans secured by first mortgages on owner occupied 1-4 family residences. Substantially all of our 1-4 family residential originations are secured by properties located in or near our market areas.

Our 1-4 family residential loans generally have maturities ranging from five to 30 years. These loans are typically fully amortizing with monthly payments sufficient to repay the total amount of the loan. Our 1-4 family residential loans are made at both fixed and adjustable interest rates.

Underwriting for 1-4 family residential loans includes debt-to-income analysis, credit history analysis, appraised value and down payment considerations. Changes in the market value of real estate can affect the potential losses in the portfolio.

Commercial Real Estate Loans

Commercial real estate loans as of June 30, 2018 consisted of \$1.13 billion of owner and non-owner occupied real estate, \$96.4 million of loans secured by multi-family properties and \$19.6 million of loans secured by farmland. Commercial real estate loans primarily include loans collateralized by retail, commercial office buildings, multi-family residential buildings, medical facilities and offices, senior living, assisted living and skilled nursing facilities, warehouse facilities, hotels and churches. Management does not consider there to be a risk in any one industry type. In determining whether to originate commercial real estate loans, we generally consider such factors as the financial condition of the borrower and the debt service coverage of the property. Commercial real estate loans are made at both fixed and adjustable interest rates for terms generally up to 20 years.

[Table of Contents](#)

Commercial Loans

Our commercial loans are diversified loan types including short-term working capital loans for inventory and accounts receivable and short- and medium-term loans for equipment or other business capital expansion. Management does not consider there to be a concentration of risk in any one industry type. In our commercial loan underwriting, we assess the creditworthiness, ability to repay, and the value and liquidity of the collateral being offered. Terms of commercial loans are generally commensurate with the useful life of the collateral offered.

Municipal Loans

We have a specific lending department that makes loans to municipalities and school districts primarily throughout the state of Texas. Municipal loans outside the state of Texas have been limited to adjoining states. The majority of the loans to municipalities and school districts have tax or revenue pledges and in some cases are additionally supported by collateral. Municipal loans made without a direct pledge of taxes or revenues are usually made based on some type of collateral that represents an essential service.

Loans to Individuals

Substantially all originations of our loans to individuals are made to consumers in our market areas. The majority of loans to individuals are collateralized by titled equipment, which are primarily automobiles. Loan terms vary according to the type and value of collateral, length of contract and creditworthiness of the borrower. The underwriting standards we employ for consumer loans include an application, a determination of the applicant's payment history on other debts, with the greatest weight being given to payment history with us, and an assessment of the borrower's ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of the applicant is a primary consideration, the underwriting process also includes a comparison of the value of the collateral, if any, in relation to the proposed loan amount. Most of our loans to individuals are collateralized, which management believes assists in limiting our exposure.

Allowance for Loan Losses

The allowance for loan losses is based on the most current review of the loan portfolio and is a result of multiple processes. First, we utilize historical net charge-off data to establish general reserve amounts for each class of loans. The historical charge-off figure is further adjusted through qualitative factors that include general trends in past dues, nonaccruals and classified loans to more effectively and promptly react to both positive and negative movements not reflected in the historical data. Second, our lenders have the primary responsibility for identifying problem loans based on customer financial stress and underlying collateral. These recommendations are reviewed by senior loan administration, the special assets department, and the loan review department on a monthly basis. Third, the loan review department independently reviews the portfolio on an annual basis. The loan review department follows a board-approved annual loan review scope. The loan review scope encompasses a number of considerations including the size of the loan, the type of credit extended, the seasoning of the loan and the performance of the loan. The loan review scope, as it relates to size, focuses more on larger dollar loan relationships, typically aggregate debt of \$500,000 or greater. The loan review officer also reviews specific reserves compared to general reserves to determine trends in comparative reserves as well as losses not reserved for prior to charge-off to determine the effectiveness of the specific reserve process.

At each review, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity from loans that do not appear to have a significant probability of loss at the time of review to loans that indicate a probability that the entire balance of the loan will be uncollectible. If at the time of review we determine it is probable that we will not collect the principal and interest cash flows contractually due on the loan, estimates of future expected cash flows or appraisals of the collateral securing the debt are used to determine the necessary allowances. The internal loan review department maintains a list ("Watch List") of all loans or loan relationships that are graded as having more than the normal degree of risk associated with them. In addition, a list of specifically reserved loans or loan relationships of \$150,000 or more is updated on a quarterly basis in order to properly determine necessary allowances and keep management informed on the status of attempts to correct the deficiencies noted with respect to the loan.

We calculate historical loss ratios for pools of loans with similar characteristics based on the proportion of actual charge-offs experienced, consistent with the characteristics of remaining loans, to the total population of loans in the pool. The historical gross loss ratios are updated quarterly based on actual charge-off experience and adjusted for qualitative factors. All loans are subject to individual analysis if determined to be impaired with the exception of consumer loans and loans secured by 1-4 family residential loans.

Industry and our own experience indicates that a portion of our loans will become delinquent and a portion of our loans will require partial or full charge-off. Regardless of the underwriting criteria utilized, losses may occur as a result of various factors beyond our control, including, among other things, changes in market conditions affecting the value of properties used as collateral for loans and problems affecting the credit worthiness of the borrower and the ability of the borrower to make payments on the

Table of Contents

loan. Our determination of the appropriateness of the allowance for loan losses is based on various considerations, including an analysis of the risk characteristics of various classifications of loans, previous loan loss experience, specific loans which have loan loss potential, delinquency trends, estimated fair value of the underlying collateral, current economic conditions, and geographic and industry loan concentration.

Credit Quality Indicators

We categorize loans into risk categories on an ongoing basis based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. We use the following definitions for risk ratings:

- Pass (Rating 1 – 4) – This rating is assigned to all satisfactory loans. This category, by definition, consists of acceptable credit. Credit and collateral exceptions should not be present, although their presence would not necessarily prohibit a loan from being rated Pass, if deficiencies are in the process of correction. These loans are not included in the Watch List.
- Pass Watch (Rating 5) – These loans require some degree of special treatment, but not due to credit quality. This category does not include loans specially mentioned or adversely classified; however, particular attention is warranted to characteristics such as:
 - A lack of, or abnormally extended payment program;
 - A heavy degree of concentration of collateral without sufficient margin;
 - A vulnerability to competition through lesser or extensive financial leverage; and
 - A dependence on a single or few customers or sources of supply and materials without suitable substitutes or alternatives.
- Special Mention (Rating 6) – A Special Mention loan has potential weaknesses that deserve management’s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or in our credit position at some future date. Special Mention loans are not adversely classified and do not expose us to sufficient risk to warrant adverse classification.
- Substandard (Rating 7) – Substandard loans are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.
- Doubtful (Rating 8) – Loans classified as Doubtful have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation, in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

All accruing loans are reserved for as a group of similar type credits and included in the general portion of the allowance for loan losses. Loans to individuals and 1-4 family residential loans, including loans not accruing, are collectively evaluated and included in the general portion of the allowance for loan losses. All loans considered troubled debt restructurings (“TDR”) are evaluated individually for impairment.

The general portion of the loan loss allowance is reflective of historical charge-off levels for similar loans adjusted for changes in current conditions and other relevant factors. These factors are likely to cause estimated losses to differ from historical loss experience and include:

- Changes in lending policies or procedures, including underwriting, collection, charge-off, and recovery procedures;
- Changes in local, regional and national economic and business conditions, including entry into new markets;
- Changes in the volume or type of credit extended;
- Changes in the experience, ability, and depth of lending management;
- Changes in the volume and severity of past due, nonaccrual, restructured, or classified loans;
- Changes in charge-off trends;
- Changes in loan review or Board oversight;
- Changes in the level of concentrations of credit; and
- Changes in external factors, such as competition and legal and regulatory requirements.

[Table of Contents](#)

These factors are also considered for the non-PCI loan portfolio specifically in regards to changes in credit quality, past due, nonaccrual and charge-off trends.

The following tables detail activity in the allowance for loan losses by portfolio segment for the periods presented (in thousands):

	Three Months Ended June 30, 2018						
	Real Estate			Commercial Loans	Municipal Loans	Loans to Individuals	Total
	Construction	1-4 Family Residential	Commercial

(1)Includes PCI loans comprised of \$161,000 pass watch, \$4.1 million special mention, \$8.2 million substandard and \$1.1 doubtful as of June 30, 2018. Includes PCI loans comprised of \$362,000 pass watch, \$6.0 million special mention, \$10.5 million substandard and \$925,000 doubtful as of December 31, 2017.

Nonperforming Assets and Past Due Loans

Nonaccrual loans are loans 90 days or more delinquent and collection in full of both the principal and interest is not expected. Additionally, some loans that are not delinquent or that are delinquent less than 90 days may be placed on nonaccrual status if it is probable that we will not receive contractual principal and interest payments in accordance with the terms of the respective loan agreement. When a loan is categorized as nonaccrual, the accrual of interest is discontinued and any accrued balance is reversed for financial statement purposes. Payments received on nonaccrual loans are applied to the outstanding principal balance. Payments of contractual interest are recognized as income only to the extent that full recovery of the principal balance of the loan is reasonably certain. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. Other factors, such as the value of collateral securing the loan and the financial condition of the borrower, are considered in judgments as to potential loan loss.

Nonaccrual loans and accruing loans past due more than 90 days include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

PCI loans are recorded at fair value at acquisition date. Although the PCI loans may be contractually delinquent, we do not classify these loans as past due or nonperforming when the timing and amount of expected cash flows can be reasonably estimated, as the loans were written down to fair value at the acquisition date and the accretable yield is recognized in interest income over the remaining life of the loan. However, subsequent to acquisition, we re-assess PCI loans for additional impairment and record additional impairment in the event we conclude it is probable that we will be unable to collect all cash flows originally expected to be collected at acquisition plus any additional cash flows expected to be collected due to changes in estimates after acquisition. All such PCI loans for which we recognize subsequent impairment are reported as impaired loans in the financial statements.

The following table sets forth nonperforming assets for the periods presented (in thousands):

	At June 30, 2018	At December 31, 2017
Nonaccrual loans (1)	\$ 35,351	\$ 2,937
Accruing loans past due more than 90 days (1)	7	1
Restructured loans (2)	5,860	5,767
Other real estate owned	1,137	1,613
Reposessed assets	68	154
Total Nonperforming Assets	<u>\$ 42,423</u>	<u>\$ 10,472</u>

(1) Excludes PCI loans measured at fair value at acquisition if the timing and amount of cash flows expected to be collected from those sales can be reasonably estimated. The increase in nonaccrual loans was primarily the result of the addition of two large commercial real estate relationships consisting of three loans in the first quarter of 2018.

(2) Includes \$2.9 million in PCI loans restructured as of June 30, 2018 and December 31, 2017.

Foreclosed assets include other real estate owned and reposessed assets. For 1-4 family residential real estate properties, a loan is recognized as a foreclosed property once legal title to the real estate property has been received upon completion of foreclosure or the borrower has conveyed all interest in the residential property through a deed in lieu of foreclosure. There were \$344,000 and \$154,000 in loans secured by 1-4 family residential properties for which formal foreclosure proceedings were in process as of June 30, 2018 and December 31, 2017, respectively.

The following table sets forth the recorded investment in nonaccrual loans by class of loans for the periods presented (in thousands). The table excludes PCI loans measured at fair value at acquisition:

	Nonaccrual Loans	
	June 30, 2018	December 31, 2017
Real Estate Loans:		
Construction	\$ 119	\$ 86
1-4 Family Residential	1,795	1,098
Commercial	32,146	595
Commercial Loans	951	903
Loans to Individuals	340	255
Total	<u>\$ 35,351</u>	<u>\$ 2,937</u>

Loans are considered impaired if, based on current information and events, it is probable we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Impairment is evaluated in total for smaller-balance loans of a similar nature and on an individual loan basis for larger loans. The measurement of loss on impaired loans is generally based on the fair value of the collateral less selling costs if repayment is expected solely from the collateral or the present value of the expected future cash flows discounted at the historical effective interest rate stipulated in the loan agreement. In measuring the fair value of the collateral, in addition to relying on third party appraisals, we use assumptions, such as discount rates, and methodologies, such as comparison to the recent selling price of similar assets, consistent with those that would be utilized by unrelated third parties performing a valuation. Loans that are evaluated and determined not to meet the definition of an impaired loan are reserved for at the general reserve rate for its appropriate class.

At the time a loss is probable in the collection of contractual amounts, specific reserves are allocated. Loans are charged off to the liquidation value of the collateral net of liquidation costs, if any, when deemed uncollectible or as soon as collection by liquidation is evident.

Table of Contents

The following tables set forth impaired loans by class of loans for the periods presented (in thousands). Impaired loans include restructured and nonaccrual loans for which the allowance was measured in accordance with section 310-10 of ASC Topic 310, "Receivables." There were no impaired loans recorded without an allowance as of June 30, 2018 or December 31, 2017.

Troubled Debt Restructurings

The restructuring of a loan is considered a TDR if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, restructuring amortization schedules and other actions intended to minimize potential losses. We may provide a combination of concessions which may include an extension of the amortization period, interest rate reduction, and/or converting the loan to interest-only for a limited period of time.

The following tables set forth the recorded balance of loans considered to be TDRs that were restructured and the type of concession during the periods presented (dollars in thousands):

	Three Months Ended June 30, 2018				
	Extend Amortization Period	Interest Rate Reductions	Combination	Total Modifications	Number of Loans
Real Estate Loans:					
1-4 Family Residential	\$ —	\$ 80	\$ —	\$ 80	1
Commercial Loans	—	—	90	90	2
Loans to Individuals	9	—	13	22	3
Total	\$ 9	\$ 80	\$ 103	\$ 192	6

	Six Months Ended June 30, 2018				
	Extend Amortization Period	Interest Rate Reductions	Combination	Total Modifications	Number of Loans
Real Estate Loans:					
1-4 Family Residential	\$ —	\$ 80	\$ —	\$ 80	1
Commercial Loans	132	—	90	222	5
Loans to Individuals	106	—	13	119	4
Total	\$ 238	\$ 80	\$ 103	\$ 421	10

	Three Months Ended June 30, 2017				
	Extend Amortization Period	Interest Rate Reductions	Combination	Total Modifications	Number of Loans
Commercial Loans	\$ 797	\$ —	\$ —	\$ 797	2
Loans to Individuals	23	—	40	63	3
Total	\$ 820	\$ —	\$ 40	\$ 860	5

	Six Months Ended June 30, 2017				
	Extend Amortization Period	Interest Rate Reductions	Combination	Total Modifications	Number of Loans
Commercial Loans	\$ 841	\$ —	\$ —	\$ 841	3
Loans to Individuals	29	—	51	80	5
Total	\$ 870	\$ —	\$ 51	\$ 921	8

The majority of loans restructured as TDRs during the six months ended June 30, 2018 and 2017 were modified with maturity extensions. Interest continues to be charged on principal balances outstanding during the extended term. Therefore, the financial effects of the recorded investment of loans restructured as TDRs during the six months ended June 30, 2018 and 2017 were not significant. Generally, the loans identified as TDRs were previously reported as impaired loans prior to restructuring and therefore the modification did not impact our determination of the allowance for loan losses.

[Table of Contents](#)

On an ongoing basis, the performance of the TDRs is monitored for subsequent payment default. Payment default for TDRs is recognized when the borrower is 90 days or more past due. For the three and six months ended June 30, 2018 and 2017, the amount of TDRs in default was not significant. Payment defaults for TDRs did not significantly impact the determination of the allowance for loan loss in either period presented.

At June 30, 2018 and 2017, there were no commitments to lend additional funds to borrowers whose terms had been modified in TDRs.

Purchased Credit Impaired Loans

The following table presents the outstanding principal balance and carrying value for PCI loans for the periods presented (in thousands):

	June 30, 2018		December 31, 2017	
Outstanding principal balance	\$	44,040	\$	52,426
Carrying amount	\$	38,199	\$	45,233

The following table presents the changes in the accretable yield during the periods for PCI loans (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Balance at beginning of period	\$ 15,818	\$ 4,003	\$ 18,721	\$ 2,480
Changes in expected cash flows not affecting non-accretable differences	—	—	(1,445)	—

Accretion	(803)	(240)	(1,941)	(536)
Balance at end of period	\$ 16,105	\$ 3,758	\$ 16,105	\$ 3,758

7. Borrowing Arrangements

Information related to borrowings is provided in the table below (dollars in thousands):

	June 30, 2018	December 31, 2017
Federal funds purchased and repurchase agreements:		
Balance at end of period	\$ 8,287	\$ 9,498
Average amount outstanding during the period (1) (5)	8,696	8,120
Maximum amount outstanding during the period (2)	8,287	9,498
Weighted average interest rate during the period (3) (5)	1.0%	0.2%
Interest rate at end of period (4)	0.8%	0.2%
FHLB borrowings:		
Balance at end of period	\$ 776,467	\$ 1,017,361
Average amount outstanding during the period (1) (5)	809,879	1,222,033
Maximum amount outstanding during the period (2)	957,231	1,414,453
Weighted average interest rate during the period (3) (5)	1.7%	1.2%
Interest rate at end of period (4)	2.0%	1.4%
Subordinated notes, net of unamortized debt issuance costs:		
Balance at end of period	\$ 98,326	\$ 98,248
Average amount outstanding during the period (1) (5)	98,287	98,172
Maximum amount outstanding during the period (2)	98,326	98,248
Weighted average interest rate during the period (3) (5)	5.8%	5.7%
Interest rate at end of period (4)	5.5%	5.5%
Trust preferred subordinated debentures, net of unamortized debt issuance costs:		
Balance at end of period	\$ 60,243	\$ 60,241
Average amount outstanding during the period (1) (5)	60,242	60,238
Maximum amount outstanding during the period (2)	60,243	60,241
Weighted average interest rate during the period (3) (5)	4.1%	3.3%
Interest rate at end of period (4)	4.4%	3.6%

- (1) The average amount outstanding during the period was computed by dividing the total daily outstanding principal balances by the number of days in the period.
- (2) The maximum amount outstanding at any month-end during the period.
- (3) The weighted average interest rate during the period was computed by dividing the actual interest expense (annualized for interim periods) by the average amount outstanding during the period. The weighted average interest rate on the FHLB borrowings includes the effect of interest rate swaps.
- (4) Stated rate.
- (5) Interim period averages are annualized.

[Table of Contents](#)

Maturities of fixed rate obligations based on scheduled repayments at June 30, 2018 are as follows (in thousands):

	Payments Due by Period						Total
	Less than 1 Year	1-2 Years	2-3 Years	3-4 Years	4-5 Years	Thereafter	
Federal funds purchased and repurchase agreements	\$ 8,031	\$ 256	\$ —	\$ —	\$ —	\$ —	\$ 8,287
FHLB borrowings	348,007	400,665	21,590	—	—	6,205	776,467
Subordinated notes, net of unamortized debt issuance costs	—	—	—	—	—	98,326	98,326
Trust preferred subordinated debentures, net of unamortized debt issuance costs	—	—	—	—	—	60,243	60,243
Total obligations	\$ 356,038	\$ 400,921	\$ 21,590	\$ —	\$ —	\$ 164,774	\$ 943,323

FHLB borrowings represent borrowings with fixed and floating interest rates ranging from 1.37% to 4.799% and with remaining maturities of five days to 10.1 years. FHLB borrowings may be collateralized by FHLB stock, nonspecified loans and/or securities.

From time to time, the Company may enter into various variable rate advance agreements with the FHLB. These advance agreements totaled \$310.0 million at June 30, 2018 and \$280.0 million December 31, 2017. Two of the variable rate advance agreements have interest rates of three-month LIBOR plus 0.021%, and one has an interest rate of three-month LIBOR minus 0.003%. The remaining advance agreements have interest rates ranging from one-month LIBOR plus 0.072% to one-month LIBOR plus 0.164%. In connection with obtaining some of these variable rate advance agreements, the Company also entered into various interest rate swap contracts that are treated as cash flow hedges under ASC Topic 815, “Derivatives and Hedging” that effectively converted the variable rate advance agreements to fixed interest rates ranging from 0.932% to 2.832% and original terms ranging from five years to ten years. The cash flows from the swaps are expected to be effective in hedging the variability in future cash flows attributable to fluctuations in the one-month and three-month LIBOR interest rates. During the first quarter of 2017, we terminated two interest rate swap contracts designated as cash flow hedges having a total notional value of \$40.0 million. At the time of termination, we determined that the underlying hedged forecasted transactions were still probable of occurring. These transactions are reevaluated on a monthly basis to determine if the hedged forecasted transactions are still probable of occurring. If at a subsequent evaluation it is determined that the transactions will not occur, any related gains or losses recorded in AOCI are immediately recognized in earnings. Refer to “Note 10 - Derivative Financial Instruments and Hedging Activities” in our consolidated financial statements included in this report for a detailed description of our hedging policy and methodology related to derivative instruments.

Southside Bank has three unsecured lines of credit for the purchase of overnight federal funds at prevailing rates with Frost Bank, TIB – The Independent Bankers Bank and Comerica Bank for \$40.0 million, \$15.0 million and \$7.5 million, respectively. There were no federal funds purchased at June 30, 2018 or December 31, 2017. Southside Bank has a \$5.0 million line of credit with Frost Bank to be used to issue letters of credit, and at June 30, 2018, we had one outstanding letter of credit for \$195,000. At June 30, 2018, the amount of additional funding Southside Bank could obtain from FHLB, collateralized by FHLB stock, nonspecified loans and securities, was approximately \$1.08 billion, net of FHLB stock purchases required. Southside Bank currently has no outstanding letters of credit from FHLB held as collateral for its public fund deposits.

Southside Bank enters into sales of securities under agreements to repurchase (“repurchase agreements”). These repurchase agreements totaled \$8.3 million and \$9.5 million at June 30, 2018 and December 31, 2017, respectively, and had maturities of less than two years. These repurchase agreements are secured by investment securities and are stated at the amount of cash received in connection with the transaction.

8. Employee Benefit Plans

The components of net periodic benefit cost (income) related to our employee benefit plans are as follows (in thousands):

	Three Months Ended June 30,					
	Defined Benefit Pension Plan		Defined Benefit Pension Plan Acquired		Restoration Plan	
	2018	2017	2018	2017	2018	2017
Service cost	\$ 390	\$ 341	\$ —	\$ —	\$ 84	\$ 73
Interest cost	839	888	41	44	165	151
Expected return on assets	(1,622)	(1,513)	(72)	(53)	—	—
Net loss amortization	372	312	—	—	248	104
Prior service (credit) cost amortization	(4)	(3)	—	—	2	1
Net periodic benefit cost (income)	\$ (25)	\$ 25	\$ (31)	\$ (9)	\$ 499	\$ 329

	Six Months Ended June 30,					
	Defined Benefit Pension Plan		Defined Benefit Pension Plan Acquired		Restoration Plan	
	2018	2017	2018	2017	2018	2017
Service cost	\$ 774	\$ 699	\$ —	\$ —	\$ 147	\$ 124
Interest cost	1,696	1,800	82	89	298	283
Expected return on assets	(3,242)	(3,025)	(145)	(107)	—	—
Net loss amortization	756	656	—	—	339	151
Prior service (credit) cost amortization	(7)	(7)	—	—	3	3
Net periodic benefit cost (income)	\$ (23)	\$ 123	\$ (63)	\$ (18)	\$ 787	\$ 561

The service cost component is recorded on our consolidated income statement as salaries and employee benefits in noninterest expense while all other components other than service cost are recorded in other noninterest expense.

9. Share-based Incentive Plans

2017 Incentive Plan

On May 10, 2017, our shareholders approved the Southside Bancshares, Inc. 2017 Incentive Plan (the “2017 Incentive Plan”), which is a stock-based incentive compensation plan. A total of 2,460,000 shares of our common stock were reserved and available for issuance pursuant to awards granted under the 2017 Incentive Plan. This amount includes a number of additional shares (not to exceed 410,000) underlying awards outstanding as of May 10, 2017 under the Company’s 2009 Incentive Plan that thereafter terminate or expire unexercised, or are cancelled, forfeited or lapse for any reason. Under the 2017 Incentive Plan, we are authorized to grant stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards, and qualified performance-based awards or any combination thereof to selected employees, officers, directors and consultants of the Company and its affiliates. As of June 30, 2018, there were 1,670,751 shares remaining available for grant for future awards.

All share data for all periods presented has been adjusted to give retroactive recognition to stock dividends unless otherwise indicated. Reference to incentive plans refers to the 2017 Incentive Plan and predecessor incentive plans.

There have been 356,849 nonqualified stock options (“NQSOs”) granted during the six months ended June 30, 2018 with an exercise price equal to the fair value of the shares at the date of grant with a weighted average exercise price of \$34.52. During the six months ended June 30, 2017, there were no stock option awards granted. The NQSOs have contractual terms of 10 years and vest in equal annual installments over either a three- or four-year period. During the six months ended June 30, 2018, we granted 52,148 restricted stock units (“RSUs”) with a total value of \$1.8 million. During the six months ended June 30, 2017, there were no RSUs granted. The RSUs vest in equal annual installments over either a one-, three- or four-year period.

Historically, shares issued in connection with stock compensation awards have been issued from available authorized shares. Beginning in the second quarter of 2017, shares were issued from available treasury shares. Shares issued in connection with stock compensation awards along with other related information are presented in the following table without the retroactive recognition of stock dividends (in thousands, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
New shares issued from available authorized shares	—	14,715	—	48,311

Total	20,872	26,482	63,051	60,078

Proceeds from stock option exercises	\$ 283	\$ 383	\$ 1,084	\$ 1,022
--------------------------------------	--------	--------	----------	----------

For the three and six months ended June 30, 2018, we had share-based compensation expense of \$509,000 and \$965,000, respectively. Share-based compensation expense for the three and six months ended June 30, 2017 was \$419,000 and \$913,000, respectively.

10. Derivative Financial Instruments and Hedging Activities

Our hedging policy allows the use of interest rate derivative instruments to manage our exposure to interest rate risk or hedge specified assets and liabilities. These instruments may include interest rate swaps and interest rate caps and floors. All derivative instruments are carried on the balance sheet at their estimated fair value and are recorded in other assets or other liabilities, as appropriate.

Derivative instruments may be designated as cash flow hedges of variable rate assets or liabilities, cash flow hedges of forecasted transactions or fair value hedges of a recognized asset or liability. Gains and losses on derivative instruments designated as cash flow hedges are recorded in AOCI to the extent that they are effective. The amount recorded in other comprehensive income is reclassified to earnings in the same periods that the hedged cash flows impact earnings. The ineffective portion of changes in fair value is reported in current earnings. Gains and losses on derivative instruments designated as fair value hedges, as well as the change in fair value on the hedged item, are recorded in interest income in the consolidated statements of income. Gains and losses due to changes in fair value of the interest rate swap agreements completely offset changes in the fair value of the hedged portion of the hedged item. Therefore, no gain or loss has been recognized due to hedge ineffectiveness.

From time to time, we have entered into certain interest rate swap contracts on specific variable rate advance agreements with the FHLB. These interest rate swap contracts were designated as hedging instruments in cash flow hedges under ASC Topic 815. The objective of the interest rate swap contracts is to manage the expected future cash flows on \$270.0 million of variable rate advance agreements with the FHLB. The cash flows from the swap are expected to be effective in hedging the variability in future cash flows attributable to fluctuations in the underlying LIBOR interest rate.

During the three months ended June 30, 2018, we entered into partial term fair value hedges, as allowed under the recently adopted ASU 2017-12, for certain of our fixed rate callable available for sale municipal securities. These partial term hedges of selected cash flows covering the time periods to the call dates of the hedged securities are expected to be effective in offsetting changes in the fair value of the hedged securities. As of June 30, 2018, hedged securities with a carrying amount of \$23.6 million are included in our AFS securities portfolio in our consolidated balance sheets. Interest rate swaps designated as partial-term fair value hedges are utilized to mitigate the effect of changing interest rates on the hedged securities. The hedging strategy converts a portion of the fixed interest rates on the securities to LIBOR-based variable interest rates.

In accordance with ASC Topic 815, if a hedging item is terminated prior to maturity for a cash settlement, the existing gain or loss within AOCI will continue to be reclassified into earnings during the period or periods in which the hedged forecasted transaction affects earnings unless it is probable that the forecasted transaction will not occur by the end of the originally specified time period. If the forecasted transaction is deemed probable to not occur, the derivative gain or loss reported in AOCI shall be reclassified into earnings immediately. During the first quarter of 2017, we terminated two interest rate swap contracts designated as cash flow hedges. At the time of termination, we determined that the underlying hedged forecasted transactions were still probable of occurring. The existing gain in AOCI will be reclassified into earnings in the same periods the hedged forecasted transaction affects earnings.

From time to time, we may enter into certain interest rate swaps, cap and floor contracts that are not designated as hedging instruments. These interest rate derivative contracts relate to transactions in which we enter into an interest rate swap, cap, or floor with a customer while concurrently entering into an offsetting interest rate swap, cap, or floor with a third-party financial institution. We agree to pay interest to the customer on a notional amount at a variable rate and receive interest from the customer on a similar notional amount at a fixed interest rate. At the same time, we agree to pay a third-party financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. These interest rate derivative contracts allow our customers to effectively convert a variable rate loan to a fixed rate loan. The changes in the fair value of the underlying derivative contracts primarily offset each other and do not significantly impact our results of operations. For derivative instruments not designated as hedging instruments, the gain or loss is recognized in current earnings during the period of change. We recognized swap fee income associated with these derivative contracts immediately based upon the difference in the bid/ask spread of the underlying transactions with the customer and the third-party financial institution. The swap fee income is included in other noninterest income in our consolidated statements of income.

At June 30, 2018, net derivative assets included \$14.9 million of cash collateral received from counterparties under master netting agreements.

The notional amounts of the derivative instruments represent the contractual cash flows pertaining to the underlying agreements. These amounts are not exchanged and are not reflected in the consolidated balance sheets. The fair value of the interest rate swaps are presented at net in other assets and other liabilities when a right of offset exists, based on transactions with a single counterparty that are subject to a legally enforceable master netting agreement.

[Table of Contents](#)

The following tables present the notional and estimated fair value amount of derivative positions outstanding (in thousands):

	June 30, 2018			December 31, 2017		
	Estimated Fair Value			Estimated Fair Value		
	Notional Amount (1)	Asset Derivative	Liability Derivative	Notional Amount (1)	Asset Derivative	Liability Derivative
Derivatives designated as hedging instruments						
Interest rate contracts:						
Swaps-Cash Flow Hedge-Financial institution counterparties	\$ 270,000	\$ 13,455	\$ —	\$ 240,000	\$ 7,922	\$ 22
Swaps-Fair Value Hedge-Financial institution counterparties	21,100	—	149	—	—	—
Derivatives designated as non-hedging instruments						
Interest rate contracts:						
Swaps-Financial institution counterparties	84,810	2,377	360	67,220	92	612
Swaps-Customer counterparties	84,810	360	2,377	67,220	612	92
Gross derivatives		16,192	2,886		8,626	726
Offsetting derivative assets/liabilities		(509)	(509)		(114)	(114)
Cash collateral received/posted		(14,850)	—		(7,900)	(520)
Net derivatives included in the consolidated balance sheets (2)		\$ 833	\$ 2,377		\$ 612	\$ 92

(1)Notional amounts, which represent the extent of involvement in the derivatives market, are used to determine the contractual cash flows required in accordance with the terms of the agreement. These amounts are typically not exchanged, significantly exceed amounts subject to credit or market risk, and are not reflected in the consolidated balance sheets.

(2)Net derivative assets are included in other assets and net derivative liabilities are included in other liabilities on the consolidated balance sheets. Included in the fair value of net derivative assets and net derivative liabilities are credit valuation adjustments reflecting counterparty credit risk and our credit risk. We had \$473,000 credit exposure related to interest rate swaps with financial institutions and \$360,000 related to interest rate swaps with customers at June 30, 2018. We had net credit exposure of \$30,000 related to interest rate swaps with financial institutions and \$612,000 related to interest rate swaps with customers at December 31, 2017. The credit risk associated with customer transactions is partially mitigated as these are generally secured by the non-cash collateral securing the underlying transaction being hedged.

The summarized expected weighted average remaining maturity of the notional amount of interest rate swaps and the weighted average interest rates associated with the amounts expected to be received or paid on interest rate swap agreements are presented below (dollars in thousands). Variable rates received on pay fixed swaps are based on one-month or three-month LIBOR rates in effect at June 30, 2018 and December 31, 2017:

	June 30, 2018				December 31, 2017			
	Notional Amount	Weighted Average			Notional Amount	Weighted Average		
		Remaining Maturity (in years)	Receive Rate	Pay Rate		Remaining Maturity (in years)	Receive Rate	Pay Rate
Swaps-Cash Flow Hedge								
Financial institution counterparties	\$ 270,000	5.3	2.12%	1.58%	\$ 240,000	5.3	1.44%	1.43%
Swaps-Fair Value Hedge								
Financial institution counterparties	21,100	8.0	2.34	3.00	—	—	—	—
Swaps-Non-Hedging								
Financial institution counterparties	84,810	12.4	2.01	2.50	67,220	12.7	1.39	2.37
Customer counterparties	84,810	12.4	2.50	2.01	67,220	12.7	2.37	1.39

11. Fair Value Measurement

Fair value is the price that would be received upon the sale of an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

Valuation techniques including the market approach, the income approach and/or the cost approach are utilized to determine fair value. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Valuation policies and procedures are determined by our investment department and reported to our Asset/Liability Committee (“ALCO”) for review. An entity must consider all aspects of nonperforming risk, including the entity’s own credit standing, when measuring fair value of a liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. A fair value hierarchy for valuation inputs gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity’s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Level 3 assets recorded at fair value on a nonrecurring basis at June 30, 2018 and December 31, 2017 included loans for which a specific allowance was established based on the fair value of collateral and commercial real estate for which fair value of the properties was less than the cost basis. For both asset classes, the unobservable inputs were the additional adjustments applied by management to the appraised values to reflect such factors as non-current appraisals and revisions to estimated time to sell. These adjustments are determined based on qualitative judgments made by management on a case-by-case basis and are not quantifiable inputs, although they are used in the determination of fair value.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Certain financial assets are measured at fair value in accordance with GAAP. Adjustments to the fair value of these assets usually result from the application of fair value accounting or write-downs of individual assets. Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with our monthly and/or quarterly valuation process. There were no transfers between Level 1 and Level 2 during the six months ended June 30, 2018 or the year ended December 31, 2017.

Securities Available for Sale and Equity Investments with readily determinable fair values – U.S. Treasury securities and equity investments are reported at fair value utilizing Level 1 inputs. Other securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, we obtain fair value measurements from independent pricing services and obtain an understanding of the pricing methodologies used by these independent pricing services. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond’s terms and conditions, among other things, as stated in the pricing methodologies of the independent pricing services.

We review and validate the prices supplied by the independent pricing services for reasonableness by comparison to prices obtained from, in most cases, two additional third party sources. For securities where prices are outside a reasonable range, we

further review those securities, based on internal ALCO approved procedures, to determine what a reasonable fair value measurement is for those securities, given available data.

Derivatives – Derivatives are reported at fair value utilizing Level 2 inputs. We obtain fair value measurements from three sources including an independent pricing service and the counterparty to the derivatives designated as hedges. The fair value measurements consider observable data that may include dealer quotes, market spreads, the U.S. Treasury yield curve, live trading levels, trade execution data, credit information and the derivatives' terms and conditions, among other things. We review the prices supplied by the sources for reasonableness. In addition, we obtain a basic understanding of their underlying pricing methodology. We validate prices supplied by the sources by comparison to one another.

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis, which means that the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets and financial liabilities measured at fair value on a nonrecurring basis included foreclosed assets and impaired loans at June 30, 2018 and December 31, 2017.

Foreclosed Assets – Foreclosed assets are initially recorded at fair value less costs to sell. The fair value measurements of foreclosed assets can include Level 2 measurement inputs such as real estate appraisals and comparable real estate sales information, in conjunction with Level 3 measurement inputs such as cash flow projections, qualitative adjustments, and sales cost estimates. As a result, the categorization of foreclosed assets is Level 3 of the fair value hierarchy. In connection with the measurement and initial recognition of certain foreclosed assets, we may recognize charge-offs through the allowance for loan losses.

Impaired Loans – Certain impaired loans may be reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria or appraisals. At June 30, 2018 and December 31, 2017, the impact of loans with specific reserves based on the fair value of the collateral was reflected in our allowance for loan losses.

Certain nonfinancial assets and nonfinancial liabilities measured at fair value on a recurring basis include reporting units measured at fair value and tested for goodwill impairment.

[Table of Contents](#)

The following tables summarize assets measured at fair value on a recurring and nonrecurring basis segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

	As of June 30, 2018			
	Fair Value Measurements at the End of the Reporting Period

- (1) All mortgage-backed securities are issued and/or guaranteed by U.S. government agencies or U.S. government-sponsored enterprises.
- (2) With the adoption of ASU 2016-01 on January 1, 2018, these investments are included in equity investments on our consolidated balance sheets. The guidance was applied on a prospective approach resulting in prior-periods no longer being comparable. See “Note 1 – Summary of Significant Accounting and Reporting Policies” for further information.
- (3) Impaired loans represent collateral-dependent loans with a specific valuation allowance. Losses on these loans represent charge-offs which are netted against the allowance for loan losses.

Disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, is required when it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other estimation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Such techniques and assumptions, as they apply to individual categories of our financial instruments, are as follows:

Cash and cash equivalents - The carrying amount for cash and cash equivalents is a reasonable estimate of those assets’ fair value.

Investment and mortgage-backed securities held to maturity - Fair values for these securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices for similar securities or estimates from independent pricing services.

FHLB stock - The carrying amount of FHLB stock is a reasonable estimate of the fair value of those assets.

Equity investments - Equity investments with readily determinable fair values are presented at fair value based upon the currently available bid-and-ask quotations publicly available on a market or exchange. The carrying value of other equity investments without readily determinable fair values are measured at cost less impairment, if any, adjusted for observable price changes for an identical or similar investment of the same issuer. This carrying value is a reasonable estimate of the fair value of those assets.

Loans receivable - With the adoption of ASU 2016-01 on January 1, 2018, we refined our methodology to estimate the fair value of our loan portfolio to an exit price notion with adjustments for liquidity, credit, and prepayment factors. The guidance was applied on a prospective approach resulting in prior-periods no longer being comparable. See “Note 1 – Summary of Significant Accounting and Reporting Policies” for further information. For December 31, 2017, adjustable rate loans that repriced frequently and with no significant change in credit risk, the carrying amounts were a reasonable estimate of those assets’ fair value and the fair value of fixed rate loans were estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Nonperforming loans continue to be estimated using discounted cash flow analyses or the underlying value of the collateral where applicable.

Loans held for sale – The fair value of loans held for sale is determined based on expected proceeds, which are based on sales contracts and commitments.

Deposit liabilities - The fair value of demand deposits, savings accounts, and certain money market deposits is the amount on demand at the reporting date, which is the carrying value. Fair values for fixed rate CDs are estimated using a discounted cash flow calculation that applies interest rates currently being offered for deposits of similar remaining maturities.

Federal funds purchased and repurchase agreements - Federal funds purchased generally have original terms to maturity of one day and repurchase agreements generally have terms of less than one year, and therefore both are considered short-term borrowings. Consequently, their carrying value is a reasonable estimate of fair value.

FHLB borrowings - The fair value of these borrowings is estimated by discounting the future cash flows using rates at which borrowings would be made to borrowers with similar credit ratings and for the same remaining maturities.

Subordinated notes - The fair value of the subordinated notes is estimated by discounting future cash flows using estimated rates at which long-term debt would be made to borrowers with similar credit ratings and for the remaining maturities.

Long-term debt - The fair value of the long-term debt is estimated by discounting future cash flows using estimated rates at which long-term debt would be made to borrowers with similar credit ratings and for the remaining maturities.

[Table of Contents](#)

The following tables present our financial assets and financial liabilities measured on a nonrecurring basis at both their respective carrying amounts and estimated fair value (in thousands):

June 30, 2018	Carrying Amount	Estimated Fair Value			
		Total	Level 1	Level 2	Level 3
Financial Assets:

Table of Contents

The fair value estimate of financial instruments for which quoted market prices are unavailable is dependent upon the assumptions used. Consequently, those estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instruments. Accordingly, the aggregate fair value amounts presented in the above fair value tables do not necessarily represent their underlying value.

12. Income Taxes

The income tax expense included in the accompanying statements of income consists of the following (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Current income tax expense	\$ 667	\$ 3,317	\$ 3,012	\$ 6,344
Deferred income tax expense	2,693	36	2,438	17
Income tax expense	<u>\$ 3,360</u>	<u>\$ 3,353</u>	<u>\$ 5,450</u>	<u>\$ 6,361</u>

The Tax Cuts and Jobs Act (“Tax Act”) was enacted on December 22, 2017. The Tax Act reduces the U.S. federal corporate tax rate from 35% to 21%. We remeasured certain deferred tax assets and liabilities as of December 22, 2017 based on the rates at which they are expected to reverse in the future, which is generally 21%. However, we are still analyzing certain aspects of the Tax Act and refining our calculations, which could potentially affect the measurement of these balances or potentially give rise to new deferred tax amounts. During the three and six months ended June 30, 2018, there were no material adjustments made to the provisional amounts recorded with the remeasurement.

The Tax Act repealed the existing Alternative Minimum Tax (“AMT”). As of June 30, 2018, we have a remaining AMT tax credit of \$3.5 million. This remaining tax credit carryforward can be used to offset regular future tax liability. Additionally, this AMT credit is refundable in any taxable year after 2017 and before 2022 in an amount equal to 50% of the excess of the minimum tax credit for the taxable year over the amount of the credit allowable for the year against regular tax liability. We expect to realize the remaining AMT tax credit in 2018 to offset tax liability.

Net deferred tax assets totaled \$15.4 million at June 30, 2018 and \$12.2 million at December 31, 2017. No valuation allowance for the net deferred tax asset was recorded at June 30, 2018 or December 31, 2017, as management believes it is more likely than not that all of the net deferred tax asset will be realized in future years. Unrecognized tax benefits were not material at June 30, 2018 or December 31, 2017.

We recognized income tax expense of \$3.4 million and \$5.5 million, for an effective tax rate (“ETR”) of 14.3% and 13.0% for the three and six months ended June 30, 2018, respectively, compared to income tax expense of \$3.4 million and \$6.4 million, for an ETR of 18.8% and 17.8%, for the three and six months ended June 30, 2017, respectively. The lower ETR for the three and six months ended June 30, 2018 was mainly due to the reduced corporate tax rate under the Tax Act from 35% to 21%. The ETR differs from the stated rate of 21% and 35% for the three and six months ended June 30, 2018 and 2017, respectively, primarily due to the effect of tax-exempt income from municipal loans and securities, as well as bank owned life insurance. We file federal income tax returns in the U.S. federal jurisdictions and in certain states. We are no longer subject to U.S. federal income tax examinations by tax authorities for years before 2014 or Texas state tax examinations by tax authorities for years before 2013.

13. Off-Balance-Sheet Arrangements, Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet Risk. In the normal course of business, we are a party to certain financial instruments with off-balance-sheet risk to meet the financing needs of our customers. These off-balance-sheet instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount reflected in the financial statements. The contract or notional amounts of these instruments reflect the extent of involvement and exposure to credit loss that we have in these particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require the payment of fees. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters

[Table of Contents](#)

of credit is essentially the same as that involved in extending loan commitments to customers and similarly do not necessarily represent future cash obligations.

Financial instruments with off-balance-sheet risk were as follows (in thousands):

	At June 30, 2018	At December 31, 2017
Unused commitments:		
Commitments to extend credit	\$ 791,154	\$ 804,715
Standby letters of credit	11,898	14,890
Total	<u>\$ 803,052</u>	<u>\$ 819,605</u>

We apply the same credit policies in making commitments and standby letters of credit as we do for on-balance-sheet instruments. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include cash or cash equivalents, negotiable instruments, real estate, accounts receivable, inventory, oil, gas and mineral interests, property, plant, and equipment.

Lease Commitments. We lease certain branch facilities and office equipment under operating leases. It is expected that certain leases will be renewed, or equipment replaced with new leased equipment, as these leases expire.

Securities. In the normal course of business we buy and sell securities. At June 30, 2018, there were \$2.3 million of unsettled trades to purchase securities and no unsettled trades to sell securities. There were no unsettled trades to purchase securities and no unsettled trades to sell securities at December 31, 2017.

Deposits. There were no unsettled issuances of brokered CDs at June 30, 2018 or December 31, 2017.

Litigation. We are involved with various litigation in the normal course of business. Management, after consulting with our legal counsel, believes that any liability resulting from litigation will not have a material effect on our financial position, results of operations or liquidity.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion of our consolidated financial condition, changes in our financial condition, and results of our operations, and should be read and reviewed in conjunction with the financial statements, and the notes thereto, in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2017.

Forward-Looking Statements

Certain statements of other than historical fact that are contained in this report may be considered to be "forward-looking statements" within the meaning of and subject to the safe harbor protections of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date. These statements may include words such as "expect," "estimate," "project," "anticipate," "appear," "believe," "could," "should," "may," "will," "would," "seek," "intend," "probability," "risk," "goal," "objective," "plans," "potential," and similar expressions. Forward-looking statements are statements with respect to our beliefs, plans, expectations, objectives, goals, anticipations, assumptions and estimates about our future performance and are subject to significant known and unknown risks and uncertainties, which could cause our actual results to differ materially from the results discussed in the forward-looking statements. For example, discussions about trends in asset quality, capital, liquidity, the pace of loan and revenue growth, the Company's ability to sell nonperforming assets, expense reductions, planned operational efficiencies, earnings and certain market risk disclosures, including the impact of interest rates and other economic factors, are based upon information presently available to management and are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and could be materially different from what actually occurs in the future. Accordingly, our results could materially differ from those that have been estimated. Other factors that could cause actual results to differ materially from those indicated by forward-looking statements include, but are not limited to, the following:

- general economic conditions, either globally, nationally, in the State of Texas, or in the specific markets in which we operate, including, without limitation, the deterioration of the commercial real estate, residential real estate, construction and development, energy, oil, and gas credit and liquidity markets, which could cause an adverse change in our net interest margin, or a decline in the value of our assets, which could result in realized losses;
- current or future legislation, regulatory changes or changes in monetary or fiscal policy that adversely affect the businesses in which we are engaged, including the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"), the Federal Reserve's actions with respect to interest rates, the capital requirements promulgated by the Basel Committee on Banking Supervision ("Basel Committee") and other regulatory responses to economic conditions;
- adverse changes in the status or financial condition of the Government-Sponsored Enterprises (the "GSEs") which impact the GSEs' guarantees or ability to pay or issue debt;
- adverse changes in the credit portfolio of other U.S. financial institutions relative to the performance of certain of our investment securities;
- economic or other disruptions caused by acts of terrorism in the United States, Europe or other areas;
- technological changes, including potential cyber-security incidents;
- our ability to identify and address cyber-security risks such as data security breaches, malware, "denial of service" attacks, "hacking" and identity theft, a failure of which could disrupt our business and result in the disclosure of and/or misuse or misappropriation of confidential or proprietary information, disruption or damage of our systems, increased costs, significant losses, or adverse effects to our reputation;
- the risk that our enterprise risk management framework may not identify or address risks adequately, which may result in unexpected losses;
- changes in the interest rate yield curve such as flat, inverted or steep yield curves, or changes in the interest rate environment that impact interest margins and may impact prepayments on our mortgage-backed securities ("MBS") portfolio;
- increases in our nonperforming assets;
- our ability to maintain adequate liquidity to fund operations and growth;
- any applicable regulatory limits or other restrictions on Southside Bank's ability to pay dividends to us;
- the failure of our assumptions underlying allowance for loan losses and other estimates;
- the effectiveness of our derivative financial instruments and hedging activities to manage risk;
- unexpected outcomes of, and the costs associated with, existing or new litigation involving us;

Table of Contents

- changes impacting our balance sheet and leverage strategy;
- risks related to actual mortgage prepayments diverging from projections;
- risks related to actual U.S. Agency MBS prepayments exceeding projected prepayment levels;
- risks related to U.S. Agency MBS prepayments increasing due to U.S. Government programs designed to assist homeowners to refinance their mortgage that might not otherwise have qualified;
- our ability to monitor interest rate risk;
- risks related to the price per barrel of crude oil;
- significant increases in competition in the banking and financial services industry;
- changes in consumer spending, borrowing and saving habits;
- the risk that we may be required to take additional charges with respect to our deferred tax assets as a result of Tax Cuts and Jobs Act (“Tax Act”) in the event our estimates prove false;
- execution of future acquisitions, reorganization or disposition transactions, including the risk that the anticipated benefits of such transactions are not realized;
- our ability to increase market share and control expenses;
- our ability to develop competitive new products and services in a timely manner and the acceptance of such products and services by our customers;
- the effect of changes in federal or state tax laws;
- the effect of compliance with legislation or regulatory changes;
- the effect of changes in accounting policies and practices;
- credit risks of borrowers, including any increase in those risks due to changing economic conditions;
- risks related to loans secured by real estate, including the risk that the value and marketability of collateral could decline; and
- other risks and uncertainties discussed in “Part I - Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2017.

All written or oral forward-looking statements made by us or attributable to us are expressly qualified by this cautionary notice. We disclaim any obligation to update any factors or to announce publicly the result of revisions to any of the forward-looking statements included herein to reflect future events or developments, unless otherwise required by law.

Critical Accounting Estimates

Our accounting and reporting estimates conform with U.S. generally accepted accounting principles (“GAAP”) and general practices within the financial services industry. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. We consider our critical accounting policies to include the following:

Allowance for Losses on Loans. The allowance for losses on loans represents our best estimate of probable losses inherent in the existing loan portfolio. The allowance for losses on loans is increased by the provision for losses on loans charged to expense and reduced by loans charged-off, net of recoveries. The provision for losses on loans is determined based on our assessment of several factors: reviews and evaluations of specific loans, changes in the nature and volume of the loan portfolio, current economic conditions and the related impact on specific borrowers and industry groups, historical loan loss experience, the level of classified and nonperforming loans and the results of regulatory examinations.

The allowance for loan loss is based on the most current review of the loan portfolio and is a result of multiple processes. The servicing officer has the primary responsibility for updating significant changes in a customer’s financial position. Each officer prepares status updates on any credit deemed to be experiencing repayment difficulties which, in the officer’s opinion, would place the collection of principal or interest in doubt. Our internal loan review department is responsible for an ongoing review of our loan portfolio with specific goals set for the loans to be reviewed on an annual basis.

At each review, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity from loans that do not appear to have a significant probability of loss at the time of review to loans that indicate a probability that the entire balance of the loan will be uncollectible. If full collection of the loan balance appears unlikely at the time of review, estimates of future expected cash flows or appraisals of the collateral securing the debt are used to determine the necessary allowances. The internal loan review department maintains a list of all loans or loan relationships that are graded as having more

than the normal degree of risk associated with them. In addition, a list of specifically reserved loans or loan relationships of \$150,000 or more is updated on a quarterly basis in order to properly determine the necessary allowance and keep management informed on the status of attempts to correct the deficiencies noted with respect to the loan.

Loans are considered impaired if, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. The measurement of loss on impaired loans is generally based on the fair value of the collateral if repayment is expected solely from the collateral or the present value of the expected future cash flows discounted at the historical effective interest rate stipulated in the loan agreement. In measuring the fair value of the collateral, in addition to relying on third party appraisals, we use assumptions such as discount rates and methodologies, comparisons to recent sales prices of similar assets, and other assumptions consistent with those that would be utilized by unrelated third parties performing a valuation.

Changes in the financial condition of individual borrowers, economic conditions, historical loss experience and the conditions of the various markets in which collateral may be sold all may affect the required level of the allowance for losses on loans and the associated provision for loan losses.

The allowance for loan losses related to purchase credit impaired (“PCI”) loans is based on an analysis that is performed quarterly to estimate the expected cash flows for each loan deemed PCI. To the extent that the expected cash flows from a PCI loan have decreased since the acquisition date, we establish or increase the allowance for loan losses.

For acquired loans that are not deemed credit impaired at acquisition, credit discounts representing the principal losses expected over the life of the loan are a component of the initial fair value. Subsequent to the purchase date, the methods utilized to estimate the required allowance for loan losses for these loans is similar to originated loans. The remaining differences between the purchase price and the unpaid principal balance at the date of acquisition are recorded in interest income over the economic life of the loan.

As of June 30, 2018, our review of the loan portfolio indicated that a loan loss allowance of \$25.1 million was appropriate to cover probable losses in the portfolio.

Refer to “Part II - Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations - Loan Loss Experience and Allowance for Loan Losses” and “Note 6 – Loans and Allowance for Probable Loan Losses” in our Annual Report on Form 10-K for the year ended December 31, 2017 for a detailed description of our estimation process and methodology related to the allowance for loan losses.

Estimation of Fair Value. The estimation of fair value is significant to a number of our assets and liabilities. In addition, GAAP requires disclosure of the fair value of financial instruments as a part of the notes to the consolidated financial statements. Fair values for securities are volatile and may be influenced by a number of factors, including market interest rates, prepayment speeds, discount rates and the shape of yield curves. Fair values for most investment and MBS are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on the quoted prices of similar instruments or estimates from independent pricing services. Where there are price variances outside certain ranges from different pricing services for specific securities, those pricing variances are reviewed with other market data to determine which of the price estimates is appropriate for that period. Fair values for our derivatives are based on measurements that consider observable data that may include dealer quotes, market spreads, the U.S. Treasury yield curve, live trading levels, trade execution data, credit information, and the derivatives’ terms and conditions, among other things. We validate prices supplied by such sources by comparison to one another.

Business Combination. During a business combination consideration is first assigned to identifiable assets and liabilities, based on estimated fair values, with any excess recorded as goodwill. Determining fair value requires significant estimates and assumptions based on an evaluation of a number of factors, such as market share, customer and employee loyalty, asset lives, and the amount and timing of prospective cash flows and the discount rate applied to the cash flows. Assets and liabilities, including deposits, core deposit intangibles, property and equipment and loans, among others, are evaluated based upon the nature of the asset or liability, the business in which it is utilized, and the economic return it is generating or expected to generate.

Deposits, in a business combination, are evaluated based upon maturity and the weighted average rate to determine the present value or fair value.

Core Deposit Intangibles represent the cost savings derived from available core deposits relative to alternative financing. The cost of deposits on hand is evaluated against the Company’s primary source of funds, or FHLB advance agreements.

For loans acquired in a business combination, refer to “Allowance for Losses on Loans” in this section.

Other intangibles are evaluated based upon the nature of the underlying asset, life and the timing of prospective cash flows.

Table of Contents

Property and equipment obtained in a business combination is evaluated at the highest and best use of the asset. Functional and economic obsolescence is also evaluated.

Impairment of Investment Securities and Mortgage-backed Securities. Investment securities and MBS classified as available for sale (“AFS”) are carried at fair value, and the impact of changes in fair value are recorded on our consolidated balance sheet as an unrealized gain or loss in “Accumulated other comprehensive (loss) income,” a separate component of shareholders’ equity. Securities classified as AFS or held to maturity (“HTM”) are subject to our review to identify when a decline in value is other-than-temporary. When it is determined that a decline in value is other-than-temporary, the carrying value of the security is reduced to its estimated fair value, with a corresponding charge to earnings for the credit portion and to other comprehensive income for the noncredit portion. Factors considered in determining whether a decline in value is other-than-temporary include: (1) whether the decline is substantial, the duration of the decline and the reasons for the decline in value; (2) whether the decline is related to a credit event, a change in interest rate or a change in the market discount rate; (3) the financial condition and near-term prospects of the issuer; and (4) whether we have a current intent to sell the security and whether it is not more likely than not that we will be required to sell the security before the anticipated recovery of its amortized cost basis. For certain assets, we consider expected cash flows of the investment in determining if impairment exists.

Defined Benefit Pension Plan. The plan obligations and related assets of our defined benefit pension plan (the “Plan”) and the OmniAmerican Bank Defined Benefit Plan (the “Acquired Plan”) are presented in “Note 11 – Employee Benefits” in our Annual Report on Form 10-K for the year ended December 31, 2017. Entry into the Plan by new employees was frozen effective December 31, 2005. Effective December 31, 2006, employee benefits under the Acquired Plan were frozen by Omni. In addition, no new participants may be added to the Acquired Plan. Assets in both plans, which consist primarily of marketable equity and debt instruments, are valued using observable market quotations. Obligations and the annual pension expense are determined by independent actuaries and through the use of a number of assumptions that are reviewed by management. Key assumptions in measuring the obligations of both plans include the discount rate and the estimated future return on assets in both plans. The rate of salary increases is another key assumption used in measuring the Plan obligation. The rate of salary increases is not required to measure the obligations of the Acquired Plan since the benefits are frozen. In determining the discount rate, we utilized a cash flow matching analysis to determine a range of appropriate discount rates for our defined benefit pension and restoration plans. In developing the cash flow matching analysis, we constructed a portfolio of high quality noncallable bonds (rated AA- or better) to match as close as possible the timing of future benefit payments of the Plans at December 31, 2017. Based on this cash flow matching analysis, we were able to determine an appropriate discount rate.

Salary increase assumptions for the Plan are based upon historical experience and our anticipated future actions. The expected long-term rate of return assumption reflects the average return expected based on the investment strategies and asset allocation on the assets invested to provide for the Plan’s liabilities. We consider broad equity and bond indices, long-term return projections, and actual long-term historical Plan performance when evaluating the expected long-term rate of return assumption. At June 30, 2018, the weighted-average actuarial assumptions of the Plan were: a discount rate of 3.71%; assumed salary increases of 3.50%; and a long-term rate of return on Plan assets of 7.25%. Material changes in pension benefit costs may occur in the future due to changes in these assumptions. Future annual amounts could be impacted by changes in the number of participants in the plans, changes in the level of benefits provided, changes in the discount rates, changes in the expected long-term rate of return, changes in the level of contributions to the plans and other factors.

Non-GAAP Financial Measures

Certain non-GAAP measures are used by management to supplement the evaluation of our performance. These include the following fully taxable-equivalent measures (“FTE”): Net interest income (FTE), Net interest margin (FTE) and Net interest spread (FTE), which include the effects of taxable-equivalent adjustments using a federal income tax rate of 21% and 35% for the three and six months ended June 30, 2018 and 2017, respectively, to increase tax-exempt interest income to a tax-equivalent basis. Interest income earned on certain assets is completely or partially exempt from federal income tax. As such, these tax-exempt instruments typically yield lower returns than taxable investments.

Net interest income (FTE), Net interest margin (FTE) and Net interest spread (FTE). Net interest income (FTE) is a non-GAAP measure that adjusts for the tax-favored status of net interest income from certain loans and investments and is not permitted under GAAP in the Consolidated Statements of Income. We believe this measure to be the preferred industry measurement of net interest income and it enhances comparability of net interest income arising from taxable and tax-exempt sources. The most directly comparable financial measure calculated in accordance with GAAP is our net interest income. Net interest margin (FTE) is the ratio of net interest income (FTE) to average earning assets. The most directly comparable financial measure calculated in accordance with GAAP is our net interest margin. Net interest spread (FTE) is the difference in the average yield on average earning assets on a tax-equivalent basis and the average rate paid on average interest bearing liabilities. The most directly comparable financial measure calculated in accordance with GAAP is our net interest spread.

Table of Contents

These non-GAAP financial measures should not be considered alternatives to GAAP-basis financial statements, and other bank holding companies may define or calculate these non-GAAP measures or similar measures differently. Whenever we present a non-GAAP financial measure in an SEC filing, we are also required to present the most directly comparable financial measure calculated and presented in accordance with GAAP and reconcile the differences between the non-GAAP financial measure and such comparable GAAP measure.

In the following table we present the reconciliation of net interest income to net interest income adjusted to a fully taxable-equivalent basis assuming a 21% and 35% marginal tax rate for the three and six months ended June 30, 2018 and 2017, respectively, for interest earned on tax-exempt assets such as municipal loans and investment securities (dollars in thousands), along with the calculation of net interest margin (FTE) and net interest spread (FTE).

Non-GAAP Reconciliations

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Net interest income (GAAP)	\$ 43,111	\$ 35,424	\$ 87,244	\$ 70,704
Tax equivalent adjustments:				
Loans	583	1,050	1,165	2,085
Investment securities (tax-exempt)	1,651	3,229	3,270	6,604
Net interest income (FTE) (1)	\$ 45,345	\$ 39,703	\$ 91,679	\$ 79,393
Average earning assets	\$ 5,700,133	\$ 5,192,897	\$ 5,795,214	\$ 5,210,871
Net interest margin	3.03%	2.74%	3.04%	2.74%
Net interest margin (FTE) (1)	3.19%	3.07%	3.19%	3.07%
Net interest spread	2.75%	2.56%	2.77%	2.58%
Net interest spread (FTE) (1)	2.90%	2.89%	2.92%	2.91%

(1) These amounts are presented on a fully taxable-equivalent basis and are non-GAAP measures.

Management believes adjusting net interest income, net interest margin and net interest spread to a fully taxable-equivalent basis is a standard practice in the banking industry as these measures provide useful information to make peer comparisons. Tax-equivalent adjustments are reported in the respective earning asset categories as listed in the “Average Balances with Average Yields and Rates” tables under Results of Operations.

Off-Balance-Sheet Arrangements, Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet Risk. In the normal course of business, we are a party to certain financial instruments with off-balance-sheet risk to meet the financing needs of our customers. These off-balance-sheet instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount reflected in the financial statements. The contract or notional amounts of these instruments reflect the extent of involvement and exposure to credit loss that we have in these particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require the payment of fees. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers and similarly do not necessarily represent future cash obligations.

Financial instruments with off-balance-sheet risk were as follows (in thousands):

	At June 30, 2018	At December 31, 2017
Unused commitments:		
Commitments to extend credit	\$ 791,154	\$ 804,715
Standby letters of credit	11,898	14,890
Total	<u>\$ 803,052</u>	<u>\$ 819,605</u>

We apply the same credit policies in making commitments and standby letters of credit as we do for on-balance-sheet instruments. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include cash or cash equivalents, negotiable instruments, real estate, accounts receivable, inventory, oil, gas and mineral interests, property, plant, and equipment.

Lease Commitments. We lease certain branch facilities and office equipment under operating leases. It is expected that certain leases will be renewed, or equipment replaced with new leased equipment, as these leases expire.

Securities. In the normal course of business we buy and sell securities. At June 30, 2018, there were \$2.3 million of unsettled trades to purchase securities and no unsettled trades to sell securities. There were no unsettled trades to purchase securities and no unsettled trades to sell securities at December 31, 2017.

Deposits. There were no unsettled issuances of brokered CDs at June 30, 2018 or December 31, 2017.

Litigation. We are a party to various litigation in the normal course of business. Management, after consulting with our legal counsel, believes that any liability resulting from litigation will not have a material effect on our financial position, results of operations or liquidity.

OVERVIEW

Operating Results

Net income increased \$5.7 million, or 39.5%, for the three months ended June 30, 2018, to \$20.2 million compared to the same period in 2017. The increase was primarily the result of a \$10.8 million increase in interest income and a \$1.7 million increase in noninterest income partially offset by a \$3.7 million increase in noninterest expense and a \$3.1 million increase in interest expense. Earnings per diluted common share increased \$0.08, or 16.3%, to \$0.57 for the three months ended June 30, 2018, from \$0.49 for the same period in 2017.

Table of Contents

During the six months ended June 30, 2018, our net income increased \$7.0 million, or 23.7%, to \$36.5 million from \$29.5 million for the same period in 2017. The increase was primarily the result of a \$23.1 million increase in interest income, a \$1.7 million increase in noninterest income and a \$0.9 million decrease in income tax expense, partially offset by a \$9.5 million increase in noninterest expense, a \$6.6 million increase in interest expense and a \$2.6 million increase in provision for loan losses. Earnings per diluted common share increased \$0.04, or 4.0% to \$1.04 for the six months ended June 30, 2018, from \$1.00 for the same period in 2017.

Financial Condition

Our total assets decreased \$247.9 million, or 3.8%, to \$6.25 billion at June 30, 2018 from \$6.50 billion at December 31, 2017 as a result of the decrease in our securities portfolio and to a lesser extent, our loan portfolio. Our securities portfolio decreased by \$246.0 million, or 10.0%, to \$2.20 billion, compared to \$2.45 billion at December 31, 2017 primarily due to sales of lower yielding AFS securities. Our FHLB stock decreased \$12.7 million, or 22.9%, to \$43.0 million from \$55.7 million at December 31, 2017 due to FHLB borrowings paid off in 2018, reducing the required amount of FHLB stock that we must hold. Our interest earning deposits increased \$27.1 million, or 24.3%, to \$138.7 million at June 30, 2018, compared to \$111.5 million at December 31, 2017.

Loans decreased \$23.5 million, or 0.7%, to \$3.27 billion compared to \$3.29 billion at December 31, 2017. The net decrease in our loan portfolio was comprised primarily of decreases of \$19.2 million of commercial real estate loans, \$17.8 million of loans to individuals and \$14.0 million of 1-4 family residential loans, partially offset by increases of \$16.3 million of commercial loans and \$11.4 million of construction loans.

Our nonperforming assets at June 30, 2018 increased 305.1%, to \$42.4 million and represented 0.68% of total assets, compared to \$10.5 million, or 0.16% of total assets at December 31, 2017. Nonaccruing loans increased \$32.4 million, or 1,103.6%, to \$35.4 million and the ratio of nonaccruing loans to total loans increased to 1.08% at June 30, 2018 compared to 0.09% at December 31, 2017. The increase in nonaccrual loans was primarily the result of the addition of two large commercial real estate relationships consisting of three loans during the first quarter of 2018. Restructured loans were \$5.9 million at June 30, 2018, an increase of \$93,000, or 1.6%, from \$5.8 million at December 31, 2017. Other Real Estate Owned ("OREO") decreased to \$1.1 million at June 30, 2018 from \$1.6 million at December 31, 2017. Repossessed assets decreased to \$68,000 at June 30, 2018 from \$154,000 at December 31, 2017.

Our deposits decreased \$6.7 million, or 0.1%, to \$4.51 billion at June 30, 2018 from \$4.52 billion at December 31, 2017. The decrease in our deposits during 2018 was the result of a decrease in public fund deposits of \$42.8 million, partially offset by an increase in private deposits of \$36.1 million. Brokered deposits, included in our private deposits, increased \$51.6 million for the six months ended June 30, 2018. Noninterest bearing deposits increased \$1.5 million and interest bearing deposits decreased \$8.2 million.

Total FHLB borrowings decreased \$240.9 million, or 23.7%, to \$776.5 million at June 30, 2018 from \$1.02 billion at December 31, 2017, while our brokered deposits increased \$51.6 million, or 82.3%, to \$114.3 million at June 30, 2018 from \$62.7 million at December 31, 2017, as we adjusted our overall interest rate risk objectives in response to the Diboll acquisition, the decreases in our securities portfolio and loan portfolio and the rising interest rate market.

Shareholders' equity at June 30, 2018 totaled \$751.8 million compared to \$754.1 million at December 31, 2017. The decrease was primarily the result of an increase in accumulated other comprehensive loss of \$21.0 million and cash dividends paid of \$20.3 million, partially offset by net income of \$36.5 million recorded for the six months ended June 30, 2018, net issuance of common stock under employee stock plans of \$965,000, stock compensation expense of \$965,000 and common stock issued under our dividend reinvestment plan of \$720,000.

Key financial indicators management follows include, but are not limited to, numerous interest rate sensitivity and interest rate risk indicators, credit risk, operations risk, liquidity risk, capital risk, regulatory risk, competition risk, yield curve risk, U.S. Agency MBS prepayment risk and economic risk indicators.

Balance Sheet Strategy

We utilize wholesale funding and securities to enhance our profitability and balance sheet composition by determining acceptable levels of credit, interest rate and liquidity risk consistent with prudent capital management. This balance sheet strategy consists of borrowing a combination of long- and short-term funds from the FHLB and, when determined appropriate, issuing brokered CDs. These funds are invested primarily in U.S. Agency MBS, and to a lesser extent, long-term municipal securities and U.S. Treasury securities. Although U.S. Agency MBS often carry lower yields than traditional mortgage loans and other types of loans we make, these securities generally (i) increase the overall quality of our assets because of either the implicit or explicit guarantees of the U.S. Government, (ii) are more liquid than individual loans and (iii) may be used to collateralize our borrowings or other obligations. While the strategy of investing a substantial portion of our assets in U.S. Agency MBS and municipal securities has historically resulted in lower interest rate spreads and margins, we believe the lower operating expenses and reduced credit risk, combined with the managed interest rate risk of this strategy, have enhanced our overall profitability over the last several years. At this time, we utilize this balance sheet strategy with the goal of enhancing overall profitability by maximizing the use of our capital.

Risks associated with the asset structure we maintain include a lower net interest rate spread and margin when compared to our peers, changes in the slope of the yield curve, which can reduce our net interest rate spread and margin, increase interest rate risk, the length of interest rate cycles, changes in volatility spreads associated with the MBS and municipal securities, the unpredictable nature of MBS prepayments and credit risks associated with the municipal securities. See “Part I - Item 1A. Risk Factors – Risks Related to Our Business” in our Annual Report on Form 10-K for the year ended December 31, 2017, for a discussion of risks related to interest rates. Our asset structure, net interest spread and net interest margin require us to closely monitor our interest rate risk. An additional risk is the change in fair value of the AFS securities portfolio as a result of changes in interest rates. Significant increases in interest rates, especially long-term interest rates, could adversely impact the fair value of the AFS securities portfolio, which could also significantly impact our equity capital. Due to the unpredictable nature of MBS prepayments, the length of interest rate cycles, and the slope of the interest rate yield curve, net interest income could fluctuate more than simulated under the scenarios modeled by our ALCO and described under “Item 3. Quantitative and Qualitative Disclosures about Market Risk” in this Quarterly Report on Form 10-Q.

Determining the appropriate size of the balance sheet is one of the critical decisions any bank makes. Our balance sheet is not merely the result of a series of micro-decisions, but rather the size is controlled based on the economics of assets compared to the economics of funding. The relatively low, but currently increasing interest rate environment and economic landscape requires that we monitor the interest rate sensitivity of the assets driving our growth and closely align ALCO objectives accordingly.

The management of our securities portfolio as a percentage of earning assets is guided by the current economics associated with increasing the securities portfolio, changes in our overall loan and deposit levels and changes in our wholesale funding levels. If adequate quality loan growth is not available to achieve our goal of enhancing profitability by maximizing the use of capital, as described above, then we may purchase additional securities, if appropriate, which may cause securities as a percentage of earning assets to increase. Should we determine that increasing the securities portfolio or replacing the current securities maturities and principal payments is not an efficient use of capital, we may decrease the level of securities through proceeds from maturities, principal payments on MBS or sales. Our balance sheet strategy is designed such that our securities portfolio should help mitigate financial performance associated with potential business cycles that include slower loan growth and higher credit costs.

Our investment securities and U.S. Agency MBS decreased from \$2.45 billion at December 31, 2017 to \$2.20 billion at June 30, 2018. The decrease was due to the flattening yield curve, higher funding costs and the realignment of the securities portfolio acquired in the Diboll acquisition to meet our balance sheet strategy and ALCO objectives in this developing interest rate environment.

During the six months ended June 30, 2018, we sold AFS securities that resulted in an overall loss on the sale of AFS securities of \$1.2 million. We primarily sold U.S. Agency debentures and mortgage related securities, along with Texas Municipals. During the fourth quarter of 2017, we recorded an impairment charge of \$234,000 in connection with \$109 million of impaired U.S. Agency debentures that we sold during January 2018. The sales of lower yielding fixed rate securities were to help alleviate margin compression brought on by the increase in interest rates by the Federal Reserve. During the six months ended June 30, 2018, sales of securities were partially offset by purchases of U.S. Agency mortgage related securities, U.S. Treasury securities and Texas municipal securities. We early-adopted ASU 2017-12, “Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities” on January 2, 2018, and in conjunction with the adoption, made the transition election to reclassify from HTM to AFS approximately \$743.4 million in book value of securities that qualified for the last-of-layer approach.

At June 30, 2018, securities decreased as a percentage of assets to 35.2% as compared to 37.7% at December 31, 2017 due to the \$246.0 million, or 10.0%, decrease in the securities portfolio. Our balance sheet management strategy is dynamic and will be continually reevaluated as market conditions warrant. As interest rates, yield curves, MBS prepayments, funding costs, security spreads and loan and deposit portfolios change, our determination of the proper types, amount and maturities of securities to own, as well as funding needs and funding sources, will continue to be reevaluated. Should the economics of purchasing securities

decrease, as it did in the first six months of this year, we may allow this part of the balance sheet to shrink through run-off or security sales. However, should the economics become more attractive, we may strategically increase the securities portfolio and the balance sheet.

With respect to liabilities, we continue to utilize a combination of FHLB borrowings and deposits to achieve our strategy of minimizing cost while achieving overall interest rate risk objectives as well as the liability management objectives of the ALCO. FHLB funding is the primary wholesale funding source we are currently utilizing.

Our FHLB borrowings decreased 23.7%, or \$240.9 million, to \$776.5 million at June 30, 2018 from \$1.02 billion at December 31, 2017. From time to time, the Company may enter into various variable rate advance agreements with the FHLB. These advance agreements totaled \$310.0 million at June 30, 2018 and \$280.0 million December 31, 2017. Two of the variable rate advance agreements have interest rates of three-month LIBOR plus 0.021%, and one has an interest rate of three-month LIBOR minus 0.003%. The remaining advance agreements have interest rates ranging from one-month LIBOR plus 0.072% to one-month LIBOR plus 0.164%. In connection with obtaining some of these variable rate advance agreements, the Company also entered into various interest rate swap contracts that are treated as cash flow hedges under ASC Topic 815, "Derivatives and Hedging" that effectively converted the variable rate advance agreements to fixed interest rates ranging from 0.932% to 2.832% and original terms ranging from five years to ten years. The cash flows from the swaps are expected to be effective in hedging the variability in future cash flows attributable to fluctuations in the one-month and three-month LIBOR interest rates. These transactions are reevaluated on a monthly basis to determine if the hedged forecasted transactions are still probable of occurring. If at a subsequent evaluation it is determined that the transactions will not occur, any related gains or losses recorded in AOCI are immediately recognized in earnings. Refer to "Note 10 - Derivative Financial Instruments and Hedging Activities" in our consolidated financial statements included in this report for a detailed description of our hedging policy and methodology related to derivative instruments.

Our brokered CDs increased 88.2% from \$60.2 million at December 31, 2017 to \$113.3 million at June 30, 2018, due to lower funding costs compared to other funding alternatives and ALCO objectives. At June 30, 2018, approximately \$110.3 million of our brokered CDs were non-callable with a weighted average cost of 189 basis points and remaining maturities of less than twelve months. The remaining \$3.0 million has a short-term call that we control and matures within eighteen months. Our wholesale funding policy currently allows maximum brokered deposits of \$250.0 million; however, this amount could be increased to match changes in ALCO objectives. The potential higher interest expense and lack of customer loyalty are risks associated with the use of brokered CDs.

During the six months ended June 30, 2018, the decrease in FHLB borrowings, partially offset by the increase in brokered CDs, resulted in a decrease in our total wholesale funding as a percentage of deposits, not including brokered deposits, to 20.3% at June 30, 2018 from 24.3% at December 31, 2017.

Results of Operations

Our results of operations are dependent primarily on net interest income, which is the difference between the interest income earned on assets (loans and investments) and interest expense due on our funding sources (deposits and borrowings) during a particular period. Results of operations are also affected by our noninterest income, provision for loan losses, noninterest expenses and income tax expense. General economic and competitive conditions, particularly changes in interest rates, changes in interest rate yield curves, prepayment rates of MBS and loans, repricing of loan relationships, government policies and actions of regulatory authorities also significantly affect our results of operations. Future changes in applicable law, regulations or government policies may also have a material impact on us.

The following table presents net interest income for the periods presented (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2018	2017	2018	2017
	(in thousands)			
Interest income				
Loans	\$ 39,301	\$ 28,090	\$ 78,131	\$ 55,344

Subordinated notes	1,407	1,398	2,805	2,791
Trust preferred subordinated debentures	658	494	1,227	961
Other borrowings	33	4	44	7
Total interest expense	13,686	10,585	26,747	20,193
Net interest income	\$ 43,111	\$ 35,424	\$ 87,244	\$ 70,704

Net Interest Income

Net interest income is one of the principal sources of a financial institution's earnings stream and represents the difference or spread between interest and fee income generated from interest earning assets and the interest expense paid on deposits and borrowed funds. Fluctuations in interest rates or interest rate yield curves, as well as repricing characteristics and volume and changes in the mix of interest earning assets and interest bearing liabilities, materially impact net interest income.

Net interest income for the three months ended June 30, 2018 increased \$7.7 million, or 21.7%, to \$43.1 million, compared to \$35.4 million for the same period in 2017. The increase in net interest income for the three months ended June 30, 2018, compared to the same period in 2017, was due to the increase in interest income from our loan portfolio, partially offset by the increase in interest expense on our deposits. Total interest income increased \$10.8 million, or 23.4%, to \$56.8 million during the three months ended June 30, 2018, compared to \$46.0 million during the same period in 2017. Total interest expense increased \$3.1 million, or 29.3%, to \$13.7 million during the three months ended June 30, 2018, compared to \$10.6 million during the same period in 2017.

Net interest income for the six months ended June 30, 2018 increased \$16.5 million, or 23.4%, to \$87.2 million, compared to \$70.7 million for the same period in 2017. The increase in net interest income for the six months ended June 30, 2018, compared to the same period in 2017, was due to the increase in interest income primarily from our loan portfolio, partially offset by the increase in interest expense on deposits. Total interest income increased \$23.1 million, or 25.4%, to \$114.0 million during the six months ended June 30, 2018, compared to \$90.9 million during the same period in 2017. Total interest expense increased \$6.6 million, or 32.5%, to \$26.7 million during the six months ended June 30, 2018, compared to \$20.2 million during the same period in 2017.

The “Average Balances with Average Yields and Rates” table that follows shows average earning assets and interest bearing liabilities together with the average yield on the earning assets and the average rate of the interest bearing liabilities (dollars in thousands) for the three months ended June 30, 2018 and 2017. The interest and related yields presented are on a fully taxable-equivalent basis and are therefore non-GAAP measures. See “Non-GAAP Financial Measures” for more information, and for a reconciliation to GAAP.

(1) Interest on loans includes net fees on loans that are not material in amount.

(2) For the purpose of calculating the average yield, the average balance of securities is presented at historical cost.

Note: As of June 30, 2018 and 2017, loans totaling \$35.4 million and \$3.0 million, respectively, were on nonaccrual status. Our policy is to reverse previously accrued but unpaid interest on nonaccrual loans; thereafter, interest income is recorded to the extent received when appropriate.

Quarterly Analysis of Changes in Interest Income and Interest Expense

The following table presents on a fully taxable-equivalent basis, a non-GAAP measure, the net change in net interest income and sets forth the dollar amount of increase (decrease) in the average volume of interest earning assets and interest bearing liabilities and from changes in yields/rates. Volume/Yield/Rate variances (change in volume times change in yield/rate) have been allocated to amounts attributable to changes in volumes and to changes in yields/rates in proportion to the amounts directly attributable to those changes (in thousands):

Fully Taxable-Equivalent Basis:	Three Months Ended June 30, 2018 Compared to 2017		
	Change Attributable to		Total Change
	Average Volume	Average Yield/Rate	
Interest income on:			
Loans (1)	\$ 8,735	\$ 2,050	\$ 10,785
Loans held for sale	(44)	3	(41)
Investment securities (taxable)	(320)	104	(216)
Investment securities (tax-exempt) (1)	633	(2,015)	(1,382)
Mortgage-backed securities	(1,080)	472	(608)
FHLB stock, at cost, and equity investments	(61)	173	112
Interest earning deposits	(190)	226	36
Federal funds sold	43	14	57
Total earning assets	7,716	1,027	8,743
Interest expense on:			
Savings deposits	52	35	87
Time deposits	480	1,100	1,580
Interest bearing demand deposits	597	1,179	1,776
FHLB borrowings	(1,871)	1,327	(544)
Subordinated notes, net of unamortized debt issuance costs	2	7	9
Trust preferred subordinated debentures, net of unamortized debt issuance costs	—	164	164
Other borrowings	1	28	29
Total interest bearing liabilities	(739)	3,840	3,101
Net change	\$ 8,455	\$ (2,813)	\$ 5,642

(1) Interest yields on loans and securities that are nontaxable for federal income tax purposes are presented on a fully taxable-equivalent basis. See “Non-GAAP Financial Measures.”

The increase in total interest income was primarily attributable to the increase in average earning assets of \$507.2 million, or 9.8%, to \$5.70 billion for the three months ended June 30, 2018 from \$5.19 billion for the same period in 2017, and to a lesser extent, the increase in the average yield on earning assets to 4.15% for the three months ended June 30, 2018 from 3.88% for the three months ended June 30, 2017. The increase in average earning assets was primarily the result of the acquisition of Diboll in the fourth quarter of 2017, partially offset by decreases in the securities portfolio and interest earning deposits. The increase in the average yield on total earning assets during the three months ended June 30, 2018 was the result of increases in the average yields on all of the earning asset categories except the average yield on tax-exempt investment securities.

The increase in total interest expense for the three months ended June 30, 2018 was primarily attributable to the increase in the average rates paid on total interest bearing liabilities to 1.25% for the three months ended June 30, 2018 from 0.99% for the three months ended June 30, 2017, and to a lesser extent, an increase in average interest bearing liabilities of \$105.8 million, or 2.5%, to \$4.38 billion during the three months ended June 30, 2018 from \$4.27 billion during the three months ended June 30, 2017. The increase in average interest-bearing liabilities was also a result of the acquisition of Diboll during the fourth quarter of 2017, partially offset by a decrease in FHLB borrowings. The increase in average rates paid on interest bearing liabilities was primarily due to rising interest rates during 2017 and 2018.

Our net interest margin (FTE) increased to 3.19% for the three months ended June 30, 2018, compared to 3.07% for the same period in 2017 and our net interest spread (FTE) increased slightly to 2.90%, compared to 2.89% for the same period in 2017.

Total earning assets	16,423	2,417	18,840
Interest expense on:			
Savings deposits	97	82	179
Time deposits	1,164	2,084	3,248
Interest bearing demand deposits	973	2,213	3,186
FHLB borrowings	(3,002)	2,626	(376)
Subordinated notes, net of unamortized debt issuance costs	4	10	14
Trust preferred subordinated debentures, net of unamortized debt issuance costs	—	266	266
Other borrowings	1	36	37
Total interest bearing liabilities	(763)	7,317	6,554
Net change	\$ 17,186	\$ (4,900)	\$ 12,286

(1) Interest yields on loans and securities that are nontaxable for federal income tax purposes are presented on a fully taxable-equivalent basis. See “Non-GAAP Financial Measures.”

The increase in total interest income was primarily attributable to the increase in average earning assets of \$584.3 million, or 11.2%, to \$5.80 billion for the six months ended June 30, 2018 from \$5.21 billion for the same period in 2017, and to a lesser extent, the increase in the average yield on earning assets to 4.12% for the six months ended June 30, 2018 from 3.85% for the six months ended June 30, 2017. The increase in average earning assets was primarily the result of the acquisition of Diboll in the fourth quarter of 2017, partially offset by decreases in the securities portfolio and interest earning deposits. The increase in the average yield on total earning assets during the six months ended June 30, 2018 was the result of increases in the average yields on all of the earning asset categories except the average yield on tax-exempt investment securities.

The increase in total interest expense for the six months ended June 30, 2018 was primarily attributable to the increase in the average rates paid on total interest bearing liabilities to 1.20% for the six months ended June 30, 2018 from 0.94% for the six months ended June 30, 2017, and to a lesser extent, the increase in average interest bearing liabilities of \$188.6 million, or 4.4%, to \$4.50 billion during the six months ended June 30, 2018 from \$4.31 billion during the six months ended June 30, 2017. The increase in average interest-bearing liabilities was also a result of the acquisition of Diboll during the fourth quarter of 2017, partially offset by a decrease in FHLB borrowings. The increase in average rates paid on interest bearing liabilities was primarily due to rising interest rates during 2017 and 2018.

Our net interest margin (FTE) increased to 3.19% for the six months ended June 30, 2018, compared to 3.07% for the same period in 2017 and our net interest spread (FTE) increased slightly to 2.92%, compared to 2.91% for the same period in 2017.

Table of Contents

Noninterest Income

Noninterest income consists of revenue generated from a broad range of financial services and activities and other fee generating services that we either provide or in which we participate.

In connection with the adoption of Accounting Standards Update 2014-09 “Revenue from Contracts with Customers (Topic 606)” effective January 1, 2018, for the three and six months ended June 30, 2018, debit card expense and brokerage service expense previously reported in ATM and debit card expense and other noninterest expense are netted with deposit services income and brokerage services income, respectively. Due to the guidance under the modified retrospective method, prior periods have not been adjusted and therefore, are not comparable.

The following table details the categories included in noninterest income (dollars in thousands):

	Three Months Ended June 30,		2018 Change From		Six Months Ended June 30,		2018 Change From	
	2018	2017	2017		2018	2017	2017	
Deposit services	\$ 6,261	\$ 5,255	\$ 1,006	19.1 %	\$ 12,440	\$ 10,369	\$ 2,071	20.0 %
Net (loss) gain on sale of securities available for sale	(332)	(75)	(257)	342.7 %	(1,159)	247	(1,406)	(569.2)%
Gain on sale of loans	173	505	(332)	(65.7)%	288	1,206	(918)	(76.1)%
Trust income	1,931	899	1,032	114.8 %	3,691	1,789	1,902	106.3 %
Bank owned life insurance income	1,185	635	550	86.6 %	1,817	1,269	548	43.2 %
Brokerage services	506	682	(176)	(25.8)%	956	1,229	(273)	(22.2)%
Other noninterest income	1,283	1,392	(109)	(7.8)%	2,584	2,857	(273)	(9.6)%
Total noninterest income	<u>\$ 11,007</u>	<u>\$ 9,293</u>	<u>\$ 1,714</u>	18.4 %	<u>\$ 20,617</u>	<u>\$ 18,966</u>	<u>\$ 1,651</u>	8.7 %

The increase in noninterest income for the three months ended June 30, 2018 when compared to the same period in 2017, was primarily due to increases in trust income, deposit services income and bank owned life insurance income.

The increase in noninterest income for the six months ended June 30, 2018 when compared to the same period in 2017, was primarily due to increases in deposit services income, trust income and bank owned life insurance income, partially offset by a decrease in net gain on sale of securities available for sale and a decrease in gain on sale of loans.

The increase in deposit services income is primarily a result of increased deposit accounts related to the Diboll acquisition on November 30, 2017. The increase consists of income of \$2.0 million and \$3.9 million prior to netting the debit card expense of \$988,000 and \$1.8 million for the three and six months ended June 30, 2018, respectively.

During the six months ended June 30, 2018, we sold U.S. Government Agency debentures, U.S. Agency CMOs, U.S. Treasury securities, U.S. Agency CMBS and Texas municipal securities that resulted in a net loss on sale of AFS securities of \$332,000 and \$1.2 million for the three and six months ended June 30, 2018, respectively.

The decrease in gain on sale of loans for the three and six months ended June 30, 2018 was primarily due to a decline in the volume of loans sold.

The increase in trust income for the three and six months ended June 30, 2018 was primarily due to the increase in assets under management, a direct result of the Diboll acquisition.

The increase in bank owned life insurance income for the three and six months ended June 30, 2018 was primarily due to the death benefits realized in the second quarter of 2018 for a retired covered officer.

Brokerage services income reflects a decrease primarily due to the netting of brokerage services expense of \$151,000 and \$302,000 for the three and six months ended June 30, 2018, respectively.

Noninterest Expense

We incur certain types of noninterest expenses associated with the operation of our various business activities. The following table details the categories included in noninterest expense (dollars in thousands):

[Table of Contents](#)

	Three Months Ended June 30,		2018 Change From		Six Months Ended June 30,		2018 Change From	
	2018	2017	2017		2018	2017	2017	
Salaries and employee benefits	\$ 16,633	\$ 14,984	\$ 1,649	11.0 %	\$ 35,192	\$ 30,991	\$ 4,201	13.6 %
Occupancy expense	3,360	2,897	463	16.0 %	6,943	5,760	1,183	20.5 %
Acquisition expense	1,026	473	553	116.9 %	1,858	473	1,385	292.8 %
Advertising, travel & entertainment	775	548	227	41.4 %	1,460	1,131	329	29.1 %
ATM and debit card expense	243	889	(646)	(72.7)%	589	1,816	(1,227)	(67.6)%
Professional fees	952	1,050	(98)	(9.3)%	2,022	1,989	33	1.7 %
Software and data processing expense	939	688	251	36.5 %	1,962	1,413	549	38.9 %
Telephone and communications	478	476	2	0.4 %	1,016	1,002	14	1.4 %
FDIC insurance	484	445	39	8.8 %	981	886	95	10.7 %
Amortization expense on intangibles	1,328	410	918	223.9 %	2,706	841	1,865	221.8 %
Other noninterest expense	3,056	2,677	379	14.2 %	6,212	5,093	1,119	22.0 %
Total noninterest expense	\$ 29,274	\$ 25,537	\$ 3,737	14.6 %	\$ 60,941	\$ 51,395	\$ 9,546	18.6 %

The increase in noninterest expense for the three and six months ended June 30, 2018 compared to the same periods in 2017, was primarily the result of the acquisition of Diboll on November 30, 2017 and certain other factors as identified below.

Salary and employee benefits increased for the three and six months ended June 30, 2018 compared to the same periods in 2017, due to increases in direct salary expense, partially offset by decreases in retirement expense. Direct salary expense increased \$1.9 million, or 15.0%, and \$4.2 million, or 15.6%, during the three and six months ended June 30, 2018, respectively, compared to the same periods in the prior year due to additional employees as a result of the acquisition of Diboll and one-time bonus payments in the first quarter of \$744,000 to certain employees in response to the benefits received from the Tax Cuts and Jobs Act, and to a lesser extent, normal salary increases effective in the first quarter of 2018. Retirement expense decreased \$560,000, or 70.8%, and \$229,000, or 15.0%, for the three and six months ended June 30, 2018, respectively, primarily due to the reversal of a split dollar liability related to the death of a retired covered officer during the second quarter of 2018.

Occupancy expense increased during the three and six months ended June 30, 2018 primarily due to increased depreciation, real estate taxes, janitorial, and various other occupancy related expense associated with the Diboll locations acquired. Also included in occupancy expense is additional rent expense of \$164,000 recorded during the first quarter of 2018 in connection with the closure of one of our retail locations located within close proximity to an acquired Diboll location.

For the three months ended June 30, 2018, acquisition expense consisted of \$441,000 in change in control payment accruals and severance payments, \$541,000 in additional professional fees and \$44,000 in travel expenses, both of the latter related to systems integration. For the six months ended June 30, 2018, acquisition expense consisted of \$1.1 million in change in control payment accruals and severance payments, \$721,000 in additional professional fees and \$44,000 in travel expenses, both of the latter related to systems integration. Acquisition expense for the three and six months ended June 30, 2017, was primarily for professional fees.

Advertising, travel and entertainment expense increased during the three and six months ended June 30, 2018 primarily due to the integration of Diboll along with increased donations throughout our service areas.

ATM and debit card expense decreased for the three and six months ended June 30, 2018 compared to the same periods in 2017. In connection with the application of ASU 2014-09 effective January 1, 2018, debit card expense related to interchange revenue of \$988,000 and \$1.8 million for the three and six months ended June 30, 2018, respectively, is now netted with deposit services income as part of noninterest income. Due to the implementation of the guidance under the modified retrospective method, prior periods have not been adjusted and therefore, are not comparable.

Software and data processing expense increased for the three and six months ended June 30, 2018 compared to the same periods in 2017 primarily due to the additional data processing expense and integration costs in connection with the acquisition of Diboll.

Amortization expense on intangibles increased for the three and six months ended June 30, 2018 as compared to the same periods in 2017. The increase in 2018 was due to increased amortization related to both the core deposit intangible and trust relationship intangible recorded with the Diboll acquisition on November 30, 2017.

Table of Contents

The increase in other noninterest expense for the three and six months ended June 30, 2018 compared to the same periods in 2017, was primarily due to increases in losses on other real estate owned, expense related to repossessed assets, director's fees and an overall general increase in other noninterest expenses directly related to the acquisition of Diboll.

Income Taxes

Pre-tax income for the three and six months ended June 30, 2018 was \$23.6 million and \$41.9 million, respectively, compared to \$17.8 million and \$35.8 million for the same periods in 2017. We recorded income tax expense of \$3.4 million and \$5.5 million for the three and six months ended June 30, 2018, respectively, compared to income tax expense of \$3.4 million and \$6.4 million for the same periods in 2017. The effective tax rate ("ETR") as a percentage of pre-tax income was 14.3% and 13.0% for the three and six months ended June 30, 2018, respectively, compared to an ETR as a percentage of pre-tax income of 18.8% and 17.8% for the same periods in 2017. The lower ETR for the three and six months ended June 30, 2018 compared to the same periods in 2017 was mainly due to the reduced corporate tax rate from 35% to 21% under the Tax Cuts and Jobs Act ("Tax Act") enacted on December 22, 2017.

The ETR differs from the stated rate of 21% and 35% for the three and six months ended June 30, 2018 and 2017, respectively, primarily due to tax-exempt income from municipal loans and securities, as well as, bank owned life insurance. The net deferred tax asset totaled \$15.4 million at June 30, 2018 as compared to \$12.2 million at December 31, 2017. The \$3.2 million increase in the net deferred tax asset is the result of the increase in unrealized loss in the AFS securities portfolio. We remeasured certain deferred tax assets and liabilities as of December 22, 2017 based on the rates at which they are expected to reverse in the future, which is generally 21%. However, we are still analyzing certain aspects of the Tax Act and refining our calculations, which could potentially affect the measurement of these balances or potentially give rise to new deferred tax amounts. During the three and six months ended June 30, 2018, there were no material adjustments made to the provisional amounts recorded with the remeasurement. See "Note 12-Income Taxes" to our consolidated financial statements included in this report. No valuation allowance for the net deferred tax asset was recorded at June 30, 2018 or December 31, 2017, as management believes it is more likely than not that all of the net deferred tax asset will be realized in future years.

Liquidity and Interest Rate Sensitivity

Liquidity management involves our ability to convert assets to cash with a minimum risk of loss to enable us to meet our obligations to our customers at any time. This means addressing (1) the immediate cash withdrawal requirements of depositors and other fund providers; (2) the funding requirements of all lines and letters of credit; and (3) the short-term credit needs of customers. Liquidity is provided by short-term investments that can be readily liquidated with a minimum risk of loss. Cash, interest earning deposits and short-term investments with maturities or repricing characteristics of one year or less continue to be a substantial percentage of our total assets. At June 30, 2018, these investments were 5.9% of total assets, as compared with 6.9% for December 31, 2017 and 7.5% for June 30, 2017. The decrease to 5.9% at June 30, 2018 is primarily reflective of changes in the investment portfolio. Liquidity is further provided through the matching, by time period, of rate sensitive interest earning assets with rate sensitive interest bearing liabilities. Southside Bank has three unsecured lines of credit for the purchase of overnight federal funds at prevailing rates with Frost Bank, TIB-The Independent Bankers Bank and Comerica Bank for \$40.0 million, \$15.0 million and \$7.5 million, respectively. There were no federal funds purchased at June 30, 2018 or December 31, 2017. Southside Bank has a \$5.0 million line of credit with Frost Bank to be used to issue letters of credit and at June 30, 2018 we had one outstanding letter of credit for \$195,000. At June 30, 2018, the amount of additional funding Southside Bank could obtain from FHLB, collateralized by FHLB stock, nonspecified loans and securities, was approximately \$1.08 billion, net of FHLB stock purchases required. Southside Bank currently has no outstanding letters of credit from FHLB held as collateral for its public fund deposits.

Interest rate sensitivity management seeks to avoid fluctuating net interest margins and to enhance consistent growth of net interest income through periods of changing interest rates. The ALCO closely monitors various liquidity ratios and interest rate spreads and margins. The ALCO utilizes a simulation model to perform interest rate simulation tests that apply various interest rate scenarios including immediate shocks and market value of portfolio equity ("MVPE") with interest rates immediately shocked plus and minus 200 basis points, among others to assist in determining our overall interest rate risk and the adequacy of our liquidity position. In addition, the ALCO utilizes this simulation model to determine the impact on net interest income of various interest rate scenarios. By utilizing this technology, we can determine changes that need to be made to the asset and liability mix to minimize the change in net interest income under these various interest rate scenarios. See Part I - "Item 3. Quantitative and Qualitative Disclosures about Market Risk" in this Quarterly Report on Form 10-Q.

Capital Resources

Our total shareholders' equity at June 30, 2018 decreased 0.3%, or \$2.3 million, to \$751.8 million, or 12.0% of total assets, compared to \$754.1 million, or 11.6% of total assets at December 31, 2017.

Table of Contents

The decrease in shareholders' equity was primarily the result of an increase in accumulated other comprehensive loss of \$21.0 million and cash dividends paid of \$20.3 million, partially offset by net income of \$36.5 million recorded for the six months ended June 30, 2018, net issuance of common stock under employee stock plans of \$965,000, stock compensation expense of \$965,000 and common stock issued under our dividend reinvestment plan of \$720,000.

As a result of regulations, which became applicable to the Company and the Bank on January 1, 2015, we are required to comply with higher minimum capital requirements (the "Updated Capital Rules"). The Updated Capital Rules made substantial changes to previous capital standards. Among other things, the regulations (i) introduced a new capital requirement known as "Common Equity Tier 1" ("CET1"), (ii) stated that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting certain requirements, (iii) defined CET1 to require that most deductions and adjustments to regulatory capital measures be made to CET1 and not to the other components of capital and (iv) revised the scope of the deductions and adjustments from capital as compared to regulations that previously applied to the Company and other banking organizations.

The Updated Capital Rules also established the following minimum capital ratios, which started to phase in on January 1, 2015: 4.5 percent CET1 to risk-weighted assets; 6.0 percent Tier 1 capital to risk-weighted assets; 8.0 percent total capital to risk-weighted assets; and 4.0 percent Tier 1 leverage ratio to average consolidated assets. In addition, the Updated Capital Rules also introduced a minimum "capital conservation buffer" equal to 2.5% of an organization's total risk-weighted assets, which exists in addition to the required minimum CET1, Tier 1, and total capital ratios. The "capital conservation buffer," which must consist entirely of CET1, is designed to absorb losses during periods of economic stress. The Updated Capital Rules provide for a number of deductions from and adjustments to CET1, which include the requirement that mortgage servicing rights, deferred tax assets arising from temporary differences that could not be realized through net operating loss carry-backs and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1.

Under the previous capital framework, the effects of accumulated other comprehensive income items included in shareholders' equity under U.S. GAAP were excluded for the purposes of determining capital ratios. Under the Updated Capital Rules, the company has elected to permanently exclude capital in accumulated other comprehensive income in Common Equity Tier 1 capital, Tier 1 capital, Total capital to risk-weighted assets and Tier 1 capital to adjusted quarterly average assets.

Under the Updated Capital Rules, certain hybrid securities, such as trust preferred securities, do not qualify as Tier 1 capital. For bank holding companies that had assets of less than \$15 billion as of December 31, 2009, which includes Southside, trust preferred securities issued prior to May 19, 2010 can be treated as Tier 1 capital to the extent that they do not exceed 25% of Tier 1 capital after the application of capital deductions and adjustments.

Failure to meet minimum capital requirements under the Updated Capital Rules could result in certain mandatory and possibly additional discretionary actions by our regulators that, if undertaken, could have a direct material effect on our financial statements. Management believes that, as of June 30, 2018, we met all capital adequacy requirements to which we were subject.

The Federal Deposit Insurance Act requires bank regulatory agencies to take "prompt corrective action" with respect to FDIC-insured depository institutions that do not meet minimum capital requirements. A depository institution's treatment for purposes of the prompt corrective action provisions will depend on how its capital levels compare to various capital measures and certain other factors, as established by regulation. Prompt corrective action and other discretionary actions could have a direct material effect on our financial statements.

It is management's intention to maintain our capital at a level acceptable to all regulatory authorities and future dividend payments will be determined accordingly. Regulatory authorities require that any dividend payments made by either us or the Bank not exceed earnings for that year. Accordingly, shareholders should not anticipate a continuation of the cash dividend payments simply because of the existence of a dividend reinvestment program. The payment of dividends will depend upon future earnings, our financial condition, and other related factors including the discretion of the board of directors.

[Table of Contents](#)

To be categorized as well capitalized we must maintain minimum Common Equity Tier 1 risk-based, Tier 1 risk-based, Total capital risk-based and Tier 1 leverage ratios as set forth in the following table:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Actions Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Amount
June 30, 2018	(dollars in thousands)					
Common Equity Tier 1 (to Risk Weighted Assets)						
Consolidated	\$ 590,293	15.49%	\$ 171,498	4.50%	N/A	N/A
Bank Only	\$ 730,689	19.17%	\$ 171,493	4.50%	\$ 247,713	6.50%

Bank Only	\$ 730,689	12.12%	\$ 241,107	4.00%	\$ 301,384	5.00%
December 31, 2017	(dollars in thousands)					
Common Equity Tier 1 (to Risk Weighted Assets)						
Consolidated	\$ 570,610	14.65%	\$ 175,216	4.50%	N/A	N/A
Bank Only	\$ 711,157	18.27%	\$ 175,145	4.50%	\$ 252,987	6.50%
Tier 1 Capital (to Risk Weighted Assets)						
Consolidated	\$ 627,532	16.12%	\$ 233,621	6.00%	N/A	N/A
Bank Only	\$ 711,157	18.27%	\$ 233,527	6.00%	\$ 311,369	8.00%
Total Capital (to Risk Weighted Assets)						
Consolidated	\$ 748,532	19.22%	\$ 311,495	8.00%	N/A	N/A
Bank Only	\$ 733,909	18.86%	\$ 311,369	8.00%	\$ 389,211	10.00%
Tier 1 Capital (to Average Assets) ⁽¹⁾						
Consolidated	\$ 627,532	11.16%	\$ 224,844	4.00%	N/A	N/A
Bank Only	\$ 711,157	12.66%	\$ 224,741	4.00%	\$ 280,926	5.00%

(1) Refers to quarterly average assets as calculated in accordance with policies established by bank regulatory agencies.

Management believes that, as of June 30, 2018, Southside Bancshares and Southside Bank would meet all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis as if such requirements were currently in effect.

Table of Contents

The table below summarizes our key equity ratios for the three and six months ended June 30, 2018 and 2017:

	Three Months Ended June 30,	
	2018	2017
Return on Average Assets	1.30%	1.04%
Return on Average Shareholders' Equity	10.79	10.70
Dividend Payout Ratio – Basic	51.72	57.14
Dividend Payout Ratio – Diluted	52.63	57.14
Average Shareholders' Equity to Average Total Assets	12.06	9.72

	Six Months Ended June 30,	
	2018	2017
Return on Average Assets	1.16%	1.06%
Return on Average Shareholders' Equity	9.77	11.13
Dividend Payout Ratio – Basic	55.77	52.48
Dividend Payout Ratio – Diluted	55.77	53.00
Average Shareholders' Equity to Average Total Assets	11.88	9.54

Composition of Loans

One of our main objectives is to seek attractive lending opportunities in Texas, primarily in the counties in which we operate. Refer to “Part I - Item 1. Business - Market Area” in our Annual Report on Form 10-K for the year ended December 31, 2017 for a discussion of our primary market area and the geographic concentration of our loan portfolio as of December 31, 2017. There were no substantial changes in these concentrations during the six months ended June 30, 2018. Substantially all of our loan originations are made to borrowers who live in and conduct business in the counties in Texas in which we operate or adjoin, with the exception of municipal loans, which are made primarily throughout the state of Texas. Municipal loans are made to municipalities, counties, school districts and colleges.

The following table sets forth loan totals by class as of the dates presented (dollars in thousands):

	June 30, 2018	December 31, 2017	June 30, 2017	Compared to	
				December 31, 2017	June 30, 2017
				Change (%)	Change (%)
Real Estate Loans:					
Construction	\$ 487,286	\$ 475,867	\$ 386,853	2.4 %	26.0%
1-4 Family Residential	791,359	805,341	615,405	(1.7)%	28.6%
Commercial	1,245,936	1,265,159	1,033,629	(1.5)%	20.5%
Commercial Loans	282,723	266,422	172,311	6.1 %	64.1%
Municipal Loans	345,595	345,798	305,023	(0.1)%	13.3%
Loans to Individuals	117,984	135,769	96,977	(13.1)%	21.7%
Total Loans	<u>\$ 3,270,883</u>	<u>\$ 3,294,356</u>	<u>\$ 2,610,198</u>	(0.7)%	25.3%

Our loan portfolio decreased \$23.5 million at June 30, 2018 compared to December 31, 2017 in the 1-4 family residential, commercial real estate and loans to individual portfolios, with those decreases partially offset by increases in the construction loan and commercial loan portfolios. During the three months ended June 30, 2018, our payoffs outpaced originations in the 1-4 family residential, commercial real estate and loans to individual portfolios.

Our loan portfolio increased \$660.7 million at June 30, 2018 compared to June 30, 2017 due primarily to approximately \$621.3 million of loans added on November 30, 2017 in the Diboll acquisition and growth in our Austin and Dallas-Fort Worth markets.

Our loan portfolio decreased at June 30, 2018 compared to December 31, 2017 primarily as a result of roll-off in 1-4 family and commercial real estate out-pacing originations and growth in the construction and commercial loan portfolios.

At June 30, 2018, our real estate loans represented 77.2% of our loan portfolio and are comprised of construction loans of 19.3%, 1-4 family residential loans of 31.3% and commercial real estate loans of 49.4%. Our construction loans are collateralized by property located primarily in or near the market areas we serve. Some of our construction loans will be owner occupied upon completion. Construction loans for non-owner occupied projects typically have cash flows from leases with tenants, secondary sources of repayment and in some cases, additional collateral. Our 1-4 family residential loans consist primarily of loans secured by first mortgages on owner occupied 1-4 family residences. Commercial real estate loans consist primarily of loans collateralized by retail, commercial office buildings, multi-family residential buildings, medical facilities and offices, senior living, assisted living and skilled nursing facilities, warehouse facilities, hotels and churches.

The banking industry is affected by general economic conditions such as interest rates, inflation, recession, unemployment and other factors beyond our control. We cannot predict whether current economic conditions will improve, remain the same or decline. A decline in credit markets generally could adversely affect our financial condition and results of operation if we are unable to extend credit or sell loans into the secondary market. During the last 30 years the Texas economy has continued to diversify, decreasing the overall impact of fluctuations in oil and gas prices; however, the oil and gas industry is still a significant component of the Texas economy. Despite a significant reduction in oil prices during 2015 and 2016 when the price per barrel of crude oil traded below \$30 at one point, the Texas economy as a whole has continued to perform very well, reflective of the economic diversity Texas has achieved. Energy loans comprised approximately 1.55% and 1.50% of our loan portfolio at June 30, 2018 and December 31, 2017, respectively.

Loan Loss Experience and Allowance for Loan Losses

The allowance for loan losses is based on the most current review of the loan portfolio and is a result of multiple processes. First, we utilize historical net charge-off data to establish general reserve amounts for each class of loans. The historical charge-off figure is further adjusted through qualitative factors that include general trends in past dues, nonaccruals and classified loans to more effectively and promptly react to both positive and negative movements not reflected in historical data. Second, our lenders have the primary responsibility for identifying problem loans based on customer financial stress and underlying collateral. These recommendations are reviewed by senior loan administration, the special assets department and the loan review department on a monthly basis. Third, the loan review department independently reviews the portfolio on an annual basis. The loan review department follows a board-approved annual loan review scope. The loan review scope encompasses a number of considerations including the size of the loan, the type of credit extended, the seasoning of the loan and the performance of the loan. The loan review scope, as it relates to size, focuses more on larger dollar loan relationships, typically aggregate debt of \$500,000 or greater. The loan review officer also reviews specific reserves compared to general reserves to determine trends in comparative reserves as well as losses not reserved for prior to charge-off to determine the effectiveness of the specific reserve process.

At each review, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity from loans that do not appear to have a significant probability of loss at the time of review to loans that indicate a probability that the entire balance of the loan will be uncollectible. If at the time of review we determine it is probable that we will not collect the principal and interest cash flows contractually due on the loan, estimates of future expected cash flows or appraisals of the collateral securing the debt are used to determine the necessary allowances. The internal loan review department maintains a list ("Watch List") of all loans or loan relationships that are graded as having more than the normal degree of risk associated with them. In addition, a list of specifically reserved loans or loan relationships of \$150,000 or more is updated on a quarterly basis in order to properly determine necessary allowances and keep management informed on the status of attempts to correct the deficiencies noted with respect to the loan.

We calculate historical loss ratios for pools of loans with similar characteristics based on the proportion of actual charge-offs experienced, consistent with the characteristics of remaining loans, to the total population of loans in the pool. The historical gross loss ratios are updated quarterly based on actual charge-off experience and adjusted for qualitative factors. All loans are subject to individual analysis if determined to be impaired with the exception of consumer loans and loans secured by 1-4 family residential loans.

Industry and our own experience indicates that a portion of our loans will become delinquent and a portion of our loans will require partial or full charge-off. Regardless of the underwriting criteria utilized, losses may occur as a result of various factors beyond our control, including, among other things, changes in market conditions affecting the value of properties used as collateral for loans and problems affecting the credit worthiness of the borrower and the ability of the borrower to make payments on the loan. Our determination of the appropriateness of the allowance for loan losses is based on various considerations, including an analysis of the risk characteristics of various classifications of loans, previous loan loss experience, specific loans which have loan loss potential, delinquency trends, estimated fair value of the underlying collateral, current economic conditions, and geographic and industry loan concentration.

After all of the data in the loan portfolio is accumulated, the reserve allocations are separated into various loan classes.

As of June 30, 2018, our review of the loan portfolio indicated that a loan loss allowance of \$25.1 million was appropriate to cover probable losses in the portfolio. Changes in economic and other conditions may require future adjustments to the allowance for loan losses.

During the six months ended June 30, 2018, the allowance for loan losses increased \$4.3 million, or 20.6%, to \$25.1 million, or 0.77% of total loans, when compared to \$20.8 million, or 0.63% of total loans at December 31, 2017, and increased \$5.8 million, or 30.3%, from \$19.2 million, or 0.74% of total loans at June 30, 2017, due primarily to an increase in nonaccruals during the first quarter of 2018 as well as growth in the loan portfolio since June 30, 2017.

For the three and six months ended June 30, 2018, loan charge-offs were \$917,000 and \$1.7 million, respectively, and recoveries were \$488,000 and \$1.0 million, respectively. For the three and six months ended June 30, 2017, loan charge-offs were \$1.1 million and \$2.1 million, respectively, and recoveries were \$498,000 and \$1.0 million, respectively. The necessary provision expense was estimated at \$1.3 million and \$5.0 million for the three and six months ended June 30, 2018, respectively, a decrease of \$65,000, or 4.8%, and an increase of \$2.6 million, or 105.2%, from \$1.3 million and \$2.4 million, respectively, for the comparable periods in 2017. The increase in provision expense for the six months ended June 30, 2018 was primarily due to two large commercial real estate loan relationships placed on nonaccrual status.

Nonperforming Assets

[Table of Contents](#)

Nonperforming assets consist of delinquent loans 90 days or more past due, nonaccrual loans, OREO, repossessed assets and restructured loans. Nonaccrual loans are loans 90 days or more delinquent and collection in full of both the principal and interest is not expected. Additionally, some loans that are not delinquent may be placed on nonaccrual status due to doubts about full collection of principal or interest. When a loan is categorized as nonaccrual, the accrual of interest is discontinued and any accrued balance is reversed for financial statement purposes. OREO represents real estate taken in full or partial satisfaction of debts previously contracted. The dollar amount of OREO is based on a current evaluation of the OREO at the time it is recorded on our books, net of estimated selling costs. Updated valuations are obtained as needed and any additional impairments are recognized. Restructured loans represent loans that have been renegotiated to provide a below market or deferral of interest or principal because of deterioration in the financial position of the borrowers. The restructuring of a loan is considered a “troubled debt restructuring” if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, principal forgiveness, restructuring amortization schedules and other actions intended to minimize potential losses. Categorization of a loan as nonperforming is not in itself a reliable indicator of potential loan loss. Other factors, such as the value of collateral securing the loan and the financial condition of the borrower must be considered in judgments as to potential loan loss.

The following tables set forth nonperforming assets for the periods presented (in thousands):

	At June 30, 2018	At December 31, 2017	At June 30, 2017
Nonaccrual loans (1)	\$ 35,351	\$ 2,937	\$ 3,034
Accruing loans past due more than 90 days (1)	7	1	—
Restructured loans (2)	5,860	5,767	5,884
Other real estate owned	1,137	1,613	233
Repossessed assets	68	154	14
Total Nonperforming Assets	\$ 42,423	\$ 10,472	\$ 9,165

(1) Excludes PCI loans measured at fair value at acquisition if the timing and amount of cash flows expected to be collected from those sales can be reasonably estimated.

(2) Includes \$2.9 million, \$2.9 million, and \$3.0 million in PCI loans restructured as of June 30, 2018, December 31, 2017, and June 30, 2017, respectively.

	At June 30, 2018	At December 31, 2017	At June 30, 2017
Asset Quality Ratios:			
Nonaccruing loans to total loans	1.08%	0.09%	0.12%
Allowance for loan losses to nonaccruing loans	70.92	707.56	634.18
Allowance for loan losses to nonperforming assets	59.10	198.44	209.94
Allowance for loan losses to total loans	0.77	0.63	0.74
Nonperforming assets to total assets	0.68	0.16	0.16
Net charge-offs to average loans	0.04	0.07	0.09

Total nonperforming assets at June 30, 2018 were \$42.4 million, an increase of \$32.0 million, or 305.1%, from \$10.5 million at December 31, 2017 and an increase of \$33.3 million, or 362.9%, from \$9.2 million at June 30, 2017.

From December 31, 2017 to June 30, 2018, nonaccrual loans increased \$32.4 million, or 1,103.6%, to \$35.4 million and increased \$32.3 million, or 1,065.2%, from June 30, 2017, primarily due to the addition of two large commercial real estate relationships consisting of three loans during the first quarter of 2018. Of the total nonaccrual loans at June 30, 2018, \$32.1 million are commercial real estate loans, \$1.8 million are 1-4 family residential real estate loans, \$1.0 million are commercial loans, \$340,000 are loans to individuals, and \$119,000 are construction loans. Restructured loans totaled \$5.9 million at June 30, 2018, an increase of \$93,000, or 1.6%, compared to December 31, 2017 and decreased \$24,000, or 0.4%, when compared to \$5.9 million at June 30, 2017. OREO decreased \$476,000, or 29.5%, to \$1.1 million at June 30, 2018 from \$1.6 million at December 31, 2017 and increased \$904,000, or 388.0%, from \$233,000 at June 30, 2017. The OREO at June 30, 2018 consisted of construction, 1-4 family residential and commercial real estate properties. We are actively marketing all OREO properties and none are being held for investment

Table of Contents

purposes. Repossessed assets decreased \$86,000, or 55.8%, to \$68,000 at June 30, 2018, from \$154,000 at December 31, 2017 and increased \$54,000, or 385.7%, from \$14,000 at June 30, 2017.

Acquisition

See “Note 2 - Acquisition” in our consolidated financial statements included in this Quarterly Report on Form 10-Q.

Branch Closures

Due to the close proximity of an acquired Diboll location to one of our branch locations in Tyler, Texas, we closed a retail branch located within the Fresh Grocery Store effective June 29, 2018. As part of the re-engineering of one of our branches during the rebranding efforts, we made the decision to relocate our Tyler South Broadway branch and drive-thru to one location which is scheduled to open during the fourth quarter of 2018 at which time our current Tyler South Broadway branch and drive-thru are scheduled to permanently close.

Recent Accounting Pronouncements

See “Note 1 – Summary of Significant Accounting and Reporting Policies” in our consolidated financial statements included in this Quarterly Report on Form 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The disclosures set forth in this item are qualified by the section captioned “Forward-Looking Statements” included in “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this report and other cautionary statements set forth elsewhere in this Quarterly Report on Form 10-Q.

Refer to the discussion of market risks included in “Item 7A. Quantitative and Qualitative Disclosures About Market Risks” in our Annual Report on Form 10-K for the year ended December 31, 2017. There have been no significant changes in the types of market risks we face since December 31, 2017.

In the banking industry, a major risk exposure is changing interest rates. The primary objective of monitoring our interest rate sensitivity, or risk, is to provide management the tools necessary to manage the balance sheet to minimize adverse changes in net interest income as a result of changes in the direction and level of interest rates. Federal Reserve Board monetary control efforts, the effects of deregulation, the economic uncertainty and legislative changes have been significant factors affecting the task of managing interest rate sensitivity positions in recent years.

In an attempt to manage our exposure to changes in interest rates, management closely monitors our exposure to interest rate risk through our ALCO. Our ALCO meets regularly and reviews our interest rate risk position and makes recommendations to our board for adjusting this position. In addition, our board reviews our asset/liability position on a monthly basis. We primarily use two methods for measuring and analyzing interest rate risk: net income simulation analysis and MVPE modeling. We utilize the net income simulation model as the primary quantitative tool in measuring the amount of interest rate risk associated with changing market rates. This model quantifies the effects of various interest rate scenarios on projected net interest income and net income over the next 12 months. The model is used to measure the impact on net interest income relative to a base case scenario of rates immediately increasing 100 and 200 basis points or decreasing 100 and 200 basis points over the next 12 months. These simulations incorporate assumptions regarding balance sheet growth and mix, pricing and the repricing and maturity characteristics of the existing and projected balance sheet. The impact of interest rate-related risks such as prepayment, basis and option risk are also considered. Due to the low level of interest rates, many of the current interest rates cannot decline 100 or 200 basis points. The model has floors for each of those interest rates, and none are assumed to go negative. As of June 30, 2018, the model simulations projected that immediate increases in interest rates of 100 and 200 basis points would result in positive variances in net interest income of 2.48% and 1.53%, respectively, relative to the base case over the next 12 months, while an immediate decrease in interest rates of 100 and 200 basis points would result in negative variances in net interest income of 0.94% and 5.64%, respectively, relative to the base case over the next 12 months. As of December 31, 2017, the model simulations projected that an immediate increase in interest rates of 100 basis points would result in a positive variance on net interest income of 0.88% and an immediate increase in interest rates of 200 basis points would result in a negative variance on net interest income of 1.13%, relative to the base case over the next 12 months, while an immediate decrease in interest rates of 100 basis points would result in a positive variance in net interest income of 1.25% and an immediate decrease in interest rates of 200 basis points would result in a negative variance on net interest income of 2.50%, relative to the base case over the next 12 months. As of June 30, 2017, the model simulations projected that 100 and 200 basis point immediate increases in interest rates would result in positive variances on net interest income of 2.55% and 3.08%, respectively, relative to the base case over the next 12 months, while an immediate decrease in interest rates of 100 and 200 basis points would result in positive variances in net interest income of 6.63% and 5.42%, respectively, relative to the base case over the next 12 months. As part of the overall assumptions, certain assets and liabilities are given reasonable floors. This type of simulation analysis requires numerous assumptions including but not limited to changes in balance sheet mix, prepayment rates on mortgage-related assets and fixed rate loans, cash flows and repricing of all financial instruments, changes in volumes and pricing, future shapes of the yield curve, relationship of market interest rates to each other (basis risk), credit spread and deposit sensitivity. Assumptions are based on management’s best estimates but may not accurately reflect actual results under certain changes in interest rates.

The ALCO monitors various liquidity ratios to ensure a satisfactory liquidity position for us. Management continually evaluates the condition of the economy, the pattern of market interest rates and other economic data to determine the types of investments that should be made and at what maturities. Using this analysis, management from time to time assumes calculated interest sensitivity gap positions to maximize net interest income based upon anticipated movements in the general level of interest rates. Regulatory authorities also monitor our gap position along with other liquidity ratios. In addition, as described above, we utilize a simulation model to determine the impact of net interest income under several different interest rate scenarios. By utilizing this technology, we can determine changes that need to be made to the asset and liability mixes to mitigate the change in net interest income under these various interest rate scenarios.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Management, including our Chief Executive Officer (“CEO”) and our Chief Financial Officer (“CFO”), undertook an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report, and, based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report, in recording, processing, summarizing and reporting in a timely manner the information that the Company is required to disclose in its reports under the Exchange Act and in accumulating and communicating to the Company’s management, including the Company’s CEO and CFO, such information as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

No changes were made to our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the quarter ended June 30, 2018 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are a party to various litigation in the normal course of business. Management, after consulting with our legal counsel, believes that any liability resulting from litigation will not have a material effect on our financial position, results of operations or liquidity.

ITEM 1A. RISK FACTORS

Additional information regarding risk factors appears in “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations - Forward-Looking Statements” of this Form 10-Q and in Part I - “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2017. There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2017. The risks and uncertainties described in our Annual Report on Form 10-K for the year ended December 31, 2017 are not the only ones we face. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

None.

ITEM 5. OTHER INFORMATION

None.

Section 2: EX-31.1 (EXHIBIT 31.1)

Exhibit 31.1

Certification of Chief Executive Officer

I, Lee R. Gibson, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Southside Bancshares, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the

registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Section 4: EX-32 (EXHIBIT 32)

Exhibit 32

**Certification of Chief Executive and Chief Financial Officer
Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to
Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the filing of the Quarterly Report on Form 10-Q for the period ended June 30, 2018 (the "Report") by Southside Bancshares, Inc. ("Registrant"), each of the undersigned hereby certifies that to his or her knowledge:

1. The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of Registrant.
